Q. [Production Life] – For each plant account or subaccount, and for each generating plant for each plant account by unit or category, please provide the following:

a. the original cost of the investment by year;

b. the current plant balance; and

c. the retirements, transfers, adjustments, etc., from the original cost by year.

The information should be provided both in hard copy and on electronic medium in Excel readable format with all formulas and references intact.

A. See electronic Attachments A through D to this response, which provide all the data utilized by Newfoundland Power's depreciation consultant, Gannett Fleming, in its preparation of the 2010 Depreciation Study. A description of the attachments is as follows:

- Attachment A provides the service life data up to the end of 2010.
- Attachment B provides the 2010 balancing data from Gannett Fleming to support the 2010 Depreciation Study.
- Attachment C contains a list of group codes with descriptions in order to facilitate interpretation of the data contained in Attachments A and B.
- Attachment D contains a list of transaction codes with descriptions to facilitate interpretation of the data contained in Attachments A to B.

Electronic versions of Attachments A through D are provided on Newfoundland Power's stranded website at the link ftp.nfpower.nf.ca.

The plant account descriptions associated with the plant account numbers provided in the attachments can be found in Volume 3, *Depreciation Study*, page no. III-4 to III-9.

a. The original cost of the investment by year can be found in Attachment A by totalling the amounts in the spreadsheet by account number and installation year. The data for generation plant range from account number 32000 to 33500. To extract the data by individual generation plant, filter the data using the appropriate group code listed in Attachment C.

b. The current plant balance can be found by totalling the original cost of the investment for all years as determined in accordance with the answer to part "a." of this question.

c. The retirements, transfers, adjustments etc., from the original cost by year can be determined from the data in Attachment A by filtering the data by the desired transaction code described in Attachment D.

TRANSACTION CODE DESCRIPTIONS

Code	Description
0	Regular Retirement. All retirements from plant which occur in the course of normal operations for causes that are to be covered by depreciation accruals. Typically, these include all causes other than those listed below.
1	Reimbursed Retirement. Retirement for which the Company received payment approximating or exceeding the depreciated original cost of the property, and such payment was recorded as a credit to the depreciation reserve account. Reimbursed retirements are usually related to extraordinary circumstances such as fire or other accidents for which the loss is covered by insurance, and to property moved or abandoned due to the requirements or requests of outside parties, for which the Company is reimbursed.
2	Sale. Transfer of ownership of property for which the Company received payment approximating or exceeding the depreciated original cost, and the property would not have been retired at or near that time if the sale had not occurred. Sales are generally related to circumstances in which the property has not actually been retired, but continues in public service following the transaction. Sales in lieu of abandonment are classified as regular retirements.
3	Transfer. Transfer of property between accounts or property groups. Use for both transfers-in and transfers-out, and for intraaccount transfers.
4	Beginning-of-Interval Transfer. Transfer of property between accounts or property groups that is to be considered as occurring at the beginning rather than the end of the age interval. Includes major transfers of property into the account or property group, such as to initiate an account or to substantially increase the size of an existing account.
5	Acquisition. Purchase, trade, or similar transaction where property previously in public service was acquired.
6	Adjustment. Used for control purposes in Plant Accounting data, and for adjustments, special appropriations, or transfers to or from the Depreciation Reserve account in Cost of Removal and Salvage data.
7	Outlier Retirement. A retirement that occurs under unusual circumstances such that the analyst deems it appropriate that it be excluded from the retirements used in the service life or salvage study.
8	Ending Balance. The balance of plant in service as of December 31 of the most recent year included in the Experience Band, or as of a specific calculation date.
9	Beginning Balance. The balance of plant in service as of December 31 of the year preceding the first year included in the Experience Band.
9	Gross Addition. Placements of plant in service as replacements of plant retired or as additions to plant in service.

Note: Corrections should be assigned the same code as the transaction being corrected.
