Government Agencies and Departments – Interconnected System

The Burgeo School and Library rate class (Special 1.3) on the Interconnected System have a “preferential” rate set many years ago (pre-1970). The Burgeo School, by far the larger customer, is a Provincial agency and the Library is a municipal customer. This rate class pays less than other similar customers in the Interconnected System and has a revenue to cost ratio of 0.47.

Other Government Agencies and Departments on the L’Anse au Loup and Island Interconnected Systems pay the same rates as Newfoundland Power customers with similar load characteristics. They are not costed individually and thus their revenue to cost coverages are not identifiable.
