

1 Q. On page 13, lines 8 to 13 of his Prefiled Testimony, Mr. Hall states that if the  
2 results are caused by unusual circumstances, and if the Board has  
3 evidenced concern with the situation and provided guidelines to the utility for  
4 improvements, and if the utility has programs in place to return to more  
5 prudent levels in the medium term, it is likely that Hydro can retain the  
6 categorization of its debt as “self-supported”, even in the face of poor results  
7 in the short-term. What does Mr. Hall recommend should be included in the  
8 Board’s report that would meet these criteria?
