

- 1 Q. Provide the costs and benefits expected to result from 1) seasonal rates, and
2 2) time-of-day rates for each customer class. Show the expected incremental
3 costs for metering, billing and settlement versus the expected reductions in
4 demand and energy costs resulting from customer load shifting in response
5 to the rates.
6
- 7 A. As outlined in response to IC-205 (2), Hydro has not conducted the studies
8 necessary to answer this question.
