

1 Q. What is the average annual cost of the Cat Arm Hydro Station and its related  
2 infrastructure? What is the revenue generated by it?

3

4 A. The cost of the Cat Arm Hydro Station for 2000 is \$21,947,243. This  
5 includes direct operating and maintenance expenses, depreciation, and  
6 prorated interest. The revenue for 2000 is \$38,063,360. This was  
7 determined by dividing the total Island Interconnected revenue by the total  
8 Island Interconnected gross production. This number is then multiplied by  
9 the gross production of the Cat Arm Hydro Station.
