

- Q. Provide Industrial Customer plans with regard to demand and generation for the years 2002 through 2006 and explain how the Industrial Customer generation plans are co-ordinated with Hydro's least cost planning efforts.
- A. CBPP and ACI Grand Falls provide 5 year forecasts of purchased power requirements to Hydro twice a year. Attached as Exhibits A and B are the latest submissions which include forecasts of these customer's generation over the same period. These forecasts are the subject of discussions between Hydro and the customer as required and new generation initiatives, if any, are discussed on an ad hoc basis when the issue arises.

ACI Stephenville has no generation. Forecast Demand and Energy are as follows:

	Demand (mw)	Energy (gwh)
2002	69.0	557.0
2003	69.0	557.2
2004	69.5	566.1
2005	70.0	572.2
2006	71.0	575.0

NARL has provided forecasts to Hydro but is no longer in possession of the specific information provided. No significant changes in proposed utilization are forecast by NARL.
