

1 Q. Provide typical load profiles for the following: winter weekday, winter
2 weekend, spring week-day, spring weekend, summer weekday, summer
3 weekend, fall weekday, and fall weekend. On each load profile, show the
4 typical resource profile for meeting the load including hydro, Holyrood and
5 combustion turbine/diesel generation.

6

7

8 A. The attached graphs show the load profiles for each of the periods
9 requested. Since combustion turbine and diesel generation are reserved for
10 peak or contingency operation, no production from these types of units are
11 expected on typical days.
