

1 Q. Did Newfoundland Power consult with Newfoundland Hydro prior to making  
2 an application to the Public Utilities Board for the consent of the Board to  
3 relocate a gas turbine generator from Salt Pond on the Burin Peninsula to  
4 Newfoundland Power's Wesleyville station in Bonavista North?

5

6

7 A. Newfoundland Power informed Hydro's Planning Department in June 2000  
8 that they were looking at generation options at the end of their radial systems  
9 as a means to improving reliability. In May of 2001, at a joint utility meeting,  
10 our Systems Operations Department was informed of a study to relocate the  
11 Salt Pond gas turbine to Wesleyville.
