

- Q. (Re: p.5, lines 1-4)
- (a) Please give the ranking of the Stephenville mill in terms of overall cost per tonne of newsprint produced from 1992 to 2000 and projected to 2004.
 - (b) Also, for the same period, provide its ranking in terms of electrical energy costs per tonne with and without the Interruptible B arrangement.
 - (c) Please state your assumptions with respect to power costs for the other mills in the ACI ranking.
- A. The manufacturing costs including power costs for ACI mills outside of Newfoundland are confidential commercial information. Furthermore, they are not relevant for the Board's understanding of the application.
