

1 Q. With respect to Henderson's evidence page 3, line 20, what has been the
2 total annual energy produced from the St. Anthony diesel plant, the
3 Roddickton mini-hydro and the mobile diesel units in Roddickton for each
4 year since connection to the interconnected system.

5

6

7 A. Please refer the response to NP-122 for all production except the mobile
8 diesel unit in Roddickton . The mobile diesel units were connected to the
9 system in late 2000. They have only been operated for testing and have
10 therefore produced a negligible amount of energy.
