

1 Q. With reference to Well's evidence page 9. lines 11 – 17, what is the proposed
2 percentage increase to the fish plants, churches and community halls?

3

4

5 A. The fish plants in the Isolated Rural Systems pay the same rates as Island
6 Interconnected General Service customers therefore their percentage
7 increase is estimated at 3.7%. Churches and community halls pay the
8 Domestic Diesel rate therefore their basic customer charge and the first 700
9 kWh block would be the same as the Island Interconnected Domestic rate.

10 The end block would receive the same percentage as the overall general
11 increase applied by Newfoundland Power therefore the overall estimated
12 increase for churches and community halls is also 3.7%.
