

- 1 Q. Further to IC-120 (3),
2 a) In 2000, what was the total amount re-allocated from Island
3 Interconnected Rural Customers to Industrial Customers?
4 b) From January 1 to June 30, 2001, what was the total amount re-
5 allocated from the Island Interconnected Rural Customers to Industrial
6 Customers?
7 c) What is the 2001 forecast for the total amount re-allocated from the
8 Island Interconnected Rural Customers to Industrial Customers?

- 9
10 A. Further to IC-120 (3),
11 a) The total amount re-allocated from rural customers to Industrial
12 customers in 2000 is \$838,000. This includes Rural Rate Alteration,
13 which is applicable to several systems and an integral part of the re-
14 allocated amount. This amount, along with appropriate interest, will
15 be credited back to the Industrial Plan in the August 2001 RSP report.
16 b) From January 1 to June 30, 2001, based on the actual RSP, the total
17 amount re-allocated from rural customers to Industrial customers is
18 \$742,000. This amount, as well as the July and August amounts,
19 along with appropriate interest, will be credited back to the Industrial
20 Plan in the August 2001 RSP report.
21 c) The 2001 forecast total amount to be re-allocated from rural
22 customers to Industrial customers is \$1,844,000. This is based upon
23 the 2001 forecast entirely, and has not been updated to reflect any
24 2001 actual activity, including removal of the rural deficit re-allocation
25 noted in parts a) and b). Subsequent to the August 2001 correction,
26 the September to December RSP will be calculated without further
27 allocation of the Rural Deficit to Industrial Customers.
