

- 1 Q. In Brickhill's schedule 2.2A, line 15, columns 3 and 4, there are terminal
2 stations classified to production demand and production and transmission
3 energy. Noting that lines 16, 17 and 18 of this schedule are for terminal
4 stations associated with hydraulic production, Holyrood and gas/turbine
5 production:
6
- 7 a. List the terminal station(s) involved.
8
- 9 b. Explain why the terminal station(s) is classified as production demand
10 and/or production and transmission energy.
11
12
- 13 A. a. The terminal station is Paradise River.
14
- 15 b. This asset was coded as Production Support, which is classified to
16 demand and energy based on total production demand and energy
17 ratios (48%/52%), derived from line 12. This asset should have been
18 coded more specifically to hydraulic production and classified to
19 demand and energy based on the hydraulic classification ratios
20 (41%/59%). This change will be incorporated in a revised filing.
