

- 1 Q. IC-34 Would Labrador City be capable of wheeling energy? If so, what  
2 would be the wheeling rate for Labrador City? Please include all calculations  
3 and assumptions used to calculate this rate.  
4  
5
- 6 A. Hydro will consider providing wheeling services to any large customer with  
7 their own generation as outlined in the responses to IC-35 and IC-36.  
8 Labrador City does not have its own generation and therefore is not capable  
9 of wheeling energy.
