

1 Q. Provide details of the generation credit for Newfoundland Power in the 2002
2 Cost of Service (JAB), Schedule II).

3

4

5 A. The credit is calculated as follows:

6

7

Newfoundland Power Installed Capacity	MW
Hydraulic	94.0
Gas Turbine	46.9
Diesel	<u>7.0</u>
Total	147.9
Less 18.5% Reserve*	<u>23.1</u>
Capacity Credit	124.8

8

9 *Note – expressed as a percent of load and calculated as

10 147.9 (1 – 1/1.185)

11

12 The current estimate of the credit in JAB Schedule II is in error and will be
13 corrected as above.
