

1 Q. In reference to page 45 in the report of Grant Thornton, LLP on  
 2 Newfoundland & Labrador Hydro's 2001 General Rate Hearing:

3  
 4 (a) Provide the monthly fuel efficiency factors that were averaged to  
 5 derive the 609.6 kWh per barrel for the year 2000.

6  
 7 (b) Provide the monthly fuel efficiency factors for 2001 year to date.

8  
 9  
 10 A. (a) The monthly fuel efficiency factors used to develop 609.6 kWh per  
 11 barrel for the year 2000 were calculated as follows:

Month	Net Production (kWh)	Fuel Consumption (Bbl)	Net Efficiency (kWh/Bbl)
Jan	186,507,480	291,261	640.3
Feb	129,303,500	226,362	571.2
Mar	105,654,220	176,047	600.1
Apr	59,624,660	102,479	581.8
May	49,395,160	86,758	569.3
Jun	(674,680)	0	-
Jul	(493,800)	0	-
Aug	(680,480)	1,912	(355.9)
Sep	43,431,420	71,501	607.4
Oct	121,646,900	188,649	644.8
Nov	83,340,800	141,519	588.9
Dec	193,228,100	305,098	633.3
<b>Total</b>	<b>970,283,280</b>	<b>1,591,586</b>	<b>609.6</b>

1 (b) The monthly fuel efficiency factors for 2001 year to date are shown in  
2 the following table:

---

Month	Net Production (kWh)	Fuel Consumption (Bbl)	Net Efficiency (kWh/Bbl)
Jan	201,681,680	320,789	628.7
Feb	174,210,620	281,034	619.9
Mar	205,518,600	329,282	624.1
Apr	185,200,000	291,320	635.7
May	139,367,200	227,928	611.5
Jun	93,985,200	153,183	613.5
Jul	58,812,900	97,107	605.7
<b>Total</b>	<b>1,058,776,200</b>	<b>1,700,643</b>	<b>622.6</b>

---
