

1 Q. RE: p. B-25 Pave Parking Area - Bishop's Falls Complex (\$69,000)

2

3 17.1 For how many years has the unpaved parking area of the Bishop's
4 Falls Complex been used? Over the period from 1992 to 2000, how
5 often has the surface of the lot been upgraded? What have been the
6 costs associated with maintaining the lot over this same period? Is
7 the road leading to the complex paved or unpaved?

8

9

10 A. 17.1 This parking lot has been in use since 1969.

11

12 Each year the top fill that is removed during snow clearing operations
13 is replaced. The lot is graded twice a year and calcium is applied at
14 least three times per year to help control dust and improve working
15 conditions. The annual cost is approximately \$2,500. The road
16 leading to the complex is paved.
