

1       Q. (a)     How many employee vehicles does NLH currently own?

2

3               (b)     How much does NLH spend on employee vehicle replacements and  
4                       employee vehicle maintenance during the average year?

5

6

7       A. (a)     Hydro currently has 24 vehicles that may be classified as “employee  
8                       vehicles”. Of these, 5 are assigned to Executive Management and  
9                       may be used for personal and business purposes. The remaining 19  
10                      are assigned to senior operations personnel for work related purposes  
11                      only.

12

13                      Other fleet vehicles are available for employee use in carrying out  
14                      work related duties.

15

16               (b)     For the 24 vehicles noted in (a) above, Hydro spends approximately  
17                       \$75,000 on replacements and \$29,250 on maintenance, annually.
