

1    Q.    On page 1 of the Corporate Overview evidence given by William E. Wells it  
2           states “Hydro indicated to the Board during its 2001 GRA that new sources of  
3           supply to meet energy and capacity requirements for the Island  
4           Interconnected System would be coming in service in 2003. NLH further  
5           advised the Board that it would, therefore, need to seek an adjustment in  
6           rates to recover the additional costs arising from these sources. This current  
7           Application is primarily driven by this requirement”. Please provide a  
8           schedule of revenues and costs pertaining to these new sources of supply.  
9           That is, please provide a calculation of the additional revenue requirement  
10          resulting from this increased capacity.
