

1    Q.    Provide the most recent residential electric sales profile available. Submit  
2           end-use daily load curves for the typical home (kW versus time) showing  
3           electric space heating, electric water heating and other end-uses as available  
4           for a winter weekday and weekend, summer weekday and weekend, spring  
5           weekday and weekend and fall weekday and weekend.

6

7

8    A.    Customer end-use daily load curves are made possible through load  
9           research programs. While Hydro has no load data research immediately  
10          available for residential customers in its service territory, Hydro is intending,  
11          subject to Board approval, to undertake in partnership with NP a load  
12          research program at a customer level commencing later in 2003.
