

1 Q. On page 27, lines 5 to 7 of Mr. Haynes' Pre-filed Evidence, he indicates that
2 NLH purchased an additional 8.6 GWh of secondary energy as a result of
3 unforeseen shutdowns at Stephenville and Grand Falls paper mills. Please
4 provide a comparison of the costs of these purchases versus the savings
5 from displaced generation.

6
7
8 A. As outlined in Schedule X of the Production Evidence, in 2002 \$155,000 was
9 charged for the 8.58 GWh of secondary energy, an average price of \$0.0180
10 per kWh. The cost to produce this equivalent energy per kWh at Holyrood, in
11 2002 using the data from Schedule VII was \$ 0.0472 per kWh.
