

1    Q.    In the pre-filed testimony of Mr. Haynes' (p.29 line 28) mention is made of a  
2           hydraulic production forecast of 4,234 GWh for 2003 and it is stated that the  
3           accompanying table (Table 7 on page 30) provides a breakdown by plant.  
4           However, the total in that Table does not equal 4,234 GWh. Please clarify.
