

1 Q. Provide the forecast deficit for the Rural Interconnected System if all
2 transmission, generation and distribution costs on the Great Northern
3 Peninsula were specifically assigned to Hydro's Island Interconnected Rural
4 Customer class. If this information appears in any Cost of Service Study that
5 has been already provided, identify the page and line number where the
6 information appears.

7
8
9 A. Based on the above plant assignment, the forecast deficit for the Rural
10 Interconnected system is \$19.4 million. This amount can be found in the
11 Cost of Service Study filed as Exhibit RDG-1, page 3, line 6, column 5.
