

1    Q.    Provide a breakdown, based on the forecast 2004 Cost of Service, of the  
2           cost of service impacts to each customer class of transferring to NP each of  
3           the areas described in the previous question assuming that only Hydro  
4           generation in those areas remains assigned as a common cost.

5

6

7    A.    This question concerns a matter of energy policy which requires Provincial  
8           Government direction and is not material or relevant to this hearing.
