

1 Q. Please confirm that after allocation of the Rural Deficit, Appendix B of Exhibit
2 JRH-3 shows the assignment of GNP generation assets to common results
3 in \$191,136 extra costs to the IC in 2004, but basically no impact on NP (less
4 than 0.005%).

5
6
7 A. In accordance with Appendix B of Exhibit JRH-3, the assignment of GNP
8 generating assets to common results in an increase to NP of \$11,830 and to
9 IC of \$191,136, after rural deficit and revenue credit allocation. The small net
10 impact to NP arises from its share in increased common costs, offset by its
11 share in a lower rural deficit.
