

1 Q. Does Hydro dispatch the NUGS or PPA energy? If so, does the pricing for
2 this energy in any way reflect capacity output (as opposed to fixed charges or
3 variable prices per kW.h)? Please explain the operation of any *capacity*
4 compensation provisions.

5

6

7 A. Hydro does not dispatch the NUGs or any PPA energy. During times of
8 system capacity limitations Hydro may ask the NUGs or other PPA
9 generators to increase their output. However, all have very limited ability to
10 do so and there is no compensation provided.
