

1 Q. Regarding Exhibit JRH-3 suppose Hydro were to adopt a category of
2 assignments that included the following three new categories: “Specifically
3 assigned to Hydro Rural and NP, but not Industrial”, “Specifically assigned to
4 NP and Industrial, but not Hydro Rural”, and “Specifically assigned to
5 Industrial and Hydro Rural, but not NP”. Which transmission and terminal
6 station assets might be reasonably reclassified from common to each of
7 these three groupings based on providing service to two groups of
8 customers, but not the third? Please provide the plant in service, net book
9 value, depreciation and O&M figures (as used in the Cost of Service Exhibit
10 RDG-1) for all assets that would properly be reclassified from common to
11 each of these three groupings.
