

1     Q.     Regarding Exhibit JRH-3 [lease indicate the forecast peak and energy to be  
2           generated by NP on the Burin peninsula in the 2004 COS.

3

4

5     A.     Hydro's forecast used in the COS is net of any forecast generation by  
6           Newfoundland Power. Newfoundland Power's forecast of the peak and  
7           energy to be generated on the Burin Peninsula for 2004 is 1.3 MW and 6.4  
8           GWh respectively.
