

1 Q. With regard to the Great Northern Peninsula interconnection in 1996, does
2 the interconnection increase the revenue requirement to any class of
3 customers in the 2004 forecast Cost of Service? If so, which class or classes
4 and by how much?

5

6

7 A. This question was answered during the NLH 2001 GRA in response to IC-
8 125(3). Subsequent to interconnection, costs on a hypothetical non-
9 interconnected or isolated basis are no longer tracked as they no longer
10 reflect the operations nor financial situation of the company. It would not be
11 possible to complete the requested information as significant material data is
12 unavailable. Moreover, the information requested is unnecessary for a
13 satisfactory understanding of the matters regarding Hydro's application
14 before the Board.
