

1 Q. With respect to the diesel units at St. Anthony, Roddickton and Hawkes Bay,
2 what was the average annual revenue from energy generated by each of
3 those units in each of the years since they were interconnected?

4

5

6 A. The annual revenue for St. Anthony, Roddickton, and Hawkes Bay, was
7 determined by dividing the total Island Interconnected revenue by the total
8 Island Interconnected gross production. This number is then multiplied by
9 the gross production for each of the diesel plants shown below.

Year	St. Anthony	Roddickton	Hawkes Bay
1996	\$45,328	\$7,799	\$25,860
1997	\$11,351	\$2,911	\$5,715
1998	\$18,377	\$5,692	\$5,389
1999	\$10,109	\$927	\$7,959
2000	\$6,320	\$0	\$2,320
2001	\$9,329	\$1,980	\$3,602
2002	\$11,803	\$940	\$4,018
