

1    Q.    Provide the same information as requested in questions 88-91 with respect  
2           to Hydro owned generation on the Burin Peninsula.

3

4

5    A.    RE: IC-88 NLH

6

7           The only Hydro owned generation on the Burin Peninsula is the 8 MW  
8           Paradise River plant. It came into service on March 17, 1989.

9

10       RE: IC-89 NLH

11

12           This is a hydro-electric run-of-river plant. It is operated to maximize energy  
13           production and for limited peaking purposes. It automatically starts and  
14           stops based on reservoir storage level and time of day.

15

16       RE: IC-90 NLH

17

18           The energy produced by this unit is provided in response to IC-7 NLH. The  
19           following table provides the available operating and maintenance costs and  
20           capital costs for the facility since 1989.

Paradise River Annual Costs		
	Direct O&M Costs <sup>(1)</sup>	Capital Costs
1989	---	\$0
1990	---	\$0
1991	---	\$0
1992	---	\$0
1993	---	\$0
1994	---	\$63,755
1995	---	\$0
1996	---	\$0
1997	---	\$70,516
1998	\$199,000	\$376,200
1999	\$265,000	\$11,556
2000	\$188,000	\$34,391
2001	\$115,000	\$0
2002	\$149,000	\$154,945
<sup>(1)</sup> Prior to 1998 the O&M Costs were not recorded by plant and therefore are not available.		

RE: IC-91 NLH

The annual revenue for Paradise River was determined using the same methodology as IC-91 NLH. See table below.

Year	Paradise River
1996	\$1,600,432
1997	\$1,545,970
1998	\$1,503,066
1999	\$1,792,534
2000	\$1,667,860
2001	\$1,337,830
2002	\$1,457,115
