

1 Q. **Reference: LC-17**

2
3 What amount of maintenance cost for the Churchill Falls to Happy Valley/
4 Goose Bay transmission line is included in the 2004 cost of service study?
5 How is this functionalized on Exhibit RDG-1, Page 92? What are the gross
6 costs, contribution and accumulated depreciation for the 46 kV lines owned
7 by Hydro in western Labrador? What are the associated maintenance costs?

8
9
10 A. Direct transmission operating and maintenance costs are located in the Cost
11 of Service Study on page 92, lines 4-6 and are related to the transmission
12 line between Churchill Falls and Happy Valley/Goose Bay, and the
13 associated terminal stations. These amounts are functionalized based on
14 plant in service values. References for the basis of functionalization are on
15 page 93, lines 4-6.

16
17 Asset values for the 46 kV lines owned by Hydro in western Labrador are not
18 separately identified in Hydro's fixed asset records, but are included as
19 distribution assets. Maintenance costs are not budgeted to this level of
20 detail.
