

Re: Page 5, lines 21-23

Q. Please list all risky or Government-initiated ventures or supply options from which customers require protection, which are not consistent with Provincial power policy objectives of efficiency and equitable power supply at the lowest possible cost. Identify the owner of the supply option and whether any IC customers are involved in ownership.

A. Mr. Osler and Mr. Bowman have not done an assessment of government-initiated ventures in Newfoundland and Labrador. The pre-filed testimony does not address or propose any measures related to such concerns.
