

1 **Q. (Re: Discussion Paper on the Rate Stabilization Plan, page 17)**
2

3 **Is Grant Thornton recommending a change in the current regulatory method of**
4 **establishing a Holyrood conversion factor when establishing rates? Please explain**
5 **why.**
6

7 **A.** As indicated in our response to NLH-149 PUB, Grant Thornton is not making any
8 recommendations relating to the options that were presented in the Discussion Paper on
9 the Rate Stabilization Plan. We would expect that any further consideration of the
10 options presented would include input from Hydro and the various stakeholders on the
11 issues and modifications discussed.
