(Re: Chart 3, page 18)

Q. Restate Chart 3 including estimated demand for domestic customers. Please explain assumptions used to derive the estimated demand.

A. As stated in Newfoundland Power's response to Request for Information NLH-65 NP, Domestic customers are not served under demand/energy rates. Newfoundland Power has not conducted a study to determine the sum of its Domestic customers' individual maximum monthly demands. Therefore, the Domestic Class's estimated total billing demand is not available to restate Chart 3.
