3 **(Re: Page 17, lines 12-14)**

4
5 **Q. Given the results of the restated Tables 5 and 6, please recalculate the before and**
6 **after tax potential variations in forecast contribution.**

7
8 A. As indicated in Newfoundland Power's responses to Requests for Information NLH-69
9 NP and NLH-70 NP, the restatement of Tables 5 and 6 is not appropriate since the RSP
10 load variation does not impact Newfoundland Power's contribution margin. As a result,
11 Newfoundland Power has not recalculated the before and after tax potential variations in
12 forecast contribution.
