

1    Q.    Please discuss the general methodology used to calculate the rate schedule  
2           for Industrial Non-Firm Service. In particular, what are the similarities and  
3           differences between the generation, wires, retail, and other general costs  
4           allocated to this rate class compared to the Industrial Firm Service rate  
5           class?

6

7

8    A.    Please refer to the responses to IC-59 NLH and IC-75 NLH.
