

1    Q.    Supposing that Hydro and NP were an integrated utility, would Hydro have  
2           employed a different strategy over the past decade to pass through a  
3           demand price signal to NP customers? If so, how would Hydro's strategy be  
4           different? If not, why not? (Reference Section 2, page 3)

5  
6  
7    A.    Due to the absence of either the experience of the hypothetical utility or data  
8           to support an alternative, no different strategy can be surmised. Moreover,  
9           the requested information is not relevant and is not necessary to understand  
10          the matters to be considered in this proceeding concerning Hydro's  
11          application.
