

1 Q. Over the past ten years, how many times have customers taken service on
 2 the wheeling rate, for what average duration, and for what average volume
 3 of energy? If data is unavailable to provide responses to these questions,
 4 please provide an order of magnitude estimate.

5
 6

7 A. In the past ten years with the exception of 1998 when Abitibi Consolidated
 8 was on strike, Abitibi Consolidated has wheeled energy every month from
 9 their Buchans generating plant and from Grand Falls to Stephenville. The
 10 following table provides the quantities of energy each year.

**Wheeled Energy
 (kWh)**

	ACCC - Grand Falls		ACCC - Stephenville	
	(kWh)	No. of Months Used	(kWh)	No. of Months Used
1993	12,555,341	12	3,079,757	12
1994	12,802,904	12	2,790,876	12
1995	12,690,186	12	1,585,327	12
1996	11,123,626	12	20,229,478	12
1997	11,976,569	12	23,897,079	12
1998	6,333,054	8	14,813,667	12
1999	10,685,849	12	24,755,230	12
2000	12,922,376	12	15,639,639	12
2001	7,501,105	12	46,575,467	12
2002	10,290,110	12	58,535,872	12
