

1 Q. Schedule II (2nd Revision-Oct.31, 2003), Page 8 of 8. J.C. Roberts

2

3 In the table relating to the August filing, Hydro had forecast to purchase

4 275,000 barrels of No. 6 fuel a month from September to December. The

5 table relating to the October filing indicates a purchase of 275,000 barrels in

6 September, no purchases in October, 275,000 barrels in November and

7 550,000 barrels in December. Why has Hydro forecast to double the

8 shipment in December when the price is forecast at \$28.10 per barrel instead

9 of purchasing 275,000 barrels in October or an additional 275,000 barrels in

10 November when the price is forecast to be lower?
