

1 Q. What is the wholesale rate charged by CF(L)Co to Hydro for power and  
2 energy requirements on the Labrador Interconnected System? How was this  
3 rate determined? **(JRH, p. 7, line 13)**  
4

5  
6 A. The wholesale energy rate charged by CF(L)Co is 0.0025426\$/kWh. In  
7 addition to this energy rate there is a monthly payment based on interest  
8 costs incurred by CF(L)Co relating to the financing of the original  
9 construction of the CF(L)Co facilities.  
10

11 These charges are equivalent to those charges by CF(L)Co to Hydro Quebec  
12 under the 1969 Power Contract so that on a per kilowatt hour basis Hydro  
13 pays the same as Hydro Quebec.
