in cooperation with the Applicant and Intervenors is providing this opportunity for individuals and representatives organizations, be they municipal councils, economic development associations, chamber of commerce, service clubs, and I noticed they're all represented on the list that I have here today for participation. And this allows you to express your views indeed directly to the Board on Hydro's rate proposals. These socalled public participation days have been scheduled this week for Stephenville, we were there yesterday, today in Corner Brook, Labrador West and Happy Valley-Goose Bay for the remainder of the week. And we're scheduling one later in St. John's.

For those of you in attendance who may not be familiar with the role of the Public Utilities Board and the process we follow in hearing a general rate application, with the indulgence of counsel for the parties, and I

The Board is a quasi judicial independent agency which derives its authority to conduct this hearing from provincial statutes and legislation, primarily the Public Utilities Act and the Electrical Power Control Act. The Board has an obligation under this legislation to regulate electric utilities operating in the province and this includes Hydro. The Board consists of nine commissioners and the three of us, including Mr. Saunders, who are appointed to this Panel have been charged with hearing this particular Application by Hydro and in accordance with our legislative responsibilities we have a duty to hear the evidence presented by the Applicant Hydro, the Intervenors, and other interested parties and at the end of the process render a fair and equitable decision on electrical rates and other regulatory matters arising from the Application. The statutes require the Board to make rate decisions that are fair and not

	Page 9
1	CHAIRMAN:
2	discriminatory. The legislation requires that
3	the utility be allowed to earn a just and
4	reasonable financial return. The legislation
5	also dictates that power be delivered to
6	customers at the lowest possible cost while
7	ensuring safe and reliable service. In
8	fulfilling its responsibilities the Board must
9	protect the interests of all parties,
10	including producers, retailers and consumers
11	of electricity. In doing this, it must also
12	try and strive to balance the interests of
13	each class of customer, whether households,
14	businesses, industries, institutions or
15	governments, whether small or large users of
16	electricity.
17	Having described a little about the role
18	of the Board, I'd like to spend just another

Having described a little about the role of the Board, I'd like to spend just another brief moment on the public hearing process itself.

Hydro submitted the Application on May the 21st at which time a notice of public hearing was advertised throughout the province. Following this, pre-hearing conferences were conducted by the Board for

Page 11 tice in terms of

normal rules of natural justice in terms of fairness, openness and transparency.

The purpose of this process is to ensure that all the necessary evidence required to reach a determination on rates and other matters contained in the Application is presented to the Panel. This process enables the Panel to assess all the issues covered by the Application and render a fair and equitable decision that will serve to balance, hopefully in the best manner possible, the interests of all stakeholders.

The public hearing is expected to substantially conclude within a couple of weeks, and following final argument by the parties and consideration of the complete body of evidence by the Panel a Board order will be issued containing a series of findings on the proposed rates and other matters submitted by Hydro in their Application. These decisions and order are not simply recommendations to government as would have been the situation prior to Hydro becoming a fully regulated utility in 1996, but by virtue of this legislative change, an order of the Board

the purpose of establishing the rules and procedures governing the hearing and also to decide on various motions filed by the parties. Also in advance of the hearing evidence was filed by Hydro on behalf of its Company and expert witnesses who were slated to appear during the hearing and requests for information were exchanged and responded to between the participating parties.

Page 10

The public hearing itself began on October the 6th and has been ongoing since that time while allowing some scheduled days off for the Board and the parties to attend to other business. The public hearing process provides for Hydro, through its counsel, to present evidence supporting its Application by calling various Company and expert witnesses. Each of the intervening parties in the hearing, through their respective counsel, have the opportunity to question and examine Hydro's witnesses and in turn present evidence offering opinions from their own experts who are also subject to cross-examination by the remaining parties. The process is somewhat similar to a court proceeding and follows the

Page 12 affecting Hydro and for that matter, Newfoundland Power, is only appealable to the courts.

As I indicated earlier, this part of the hearing is to provide for persons and organizations such as those presenting here today to have input and comment on the proposed rate increases and any other issues arising from the Application that may impact them. This can be done in one of two ways, either by oral presentation, which is being heard here today in Corner Brook or by way of letter of comment which can be filed with the Board at any time prior to the close of the hearing. Letters of comment can be submitted by simply contacting the Board secretary, Ms. Blundon, who will provide all the necessary information concerning addresses and answer any questions that you may have in this regard.

All the oral and written material submitted by individuals and organizations will form a part of the official record for this hearing and the oral submissions presented today along with any letters of

Page 13 1 CHAIRMAN: comment will combine with the documentation resulting from the formal proceedings and will 3 contribute to the total body of evidence which 4 will be considered by this Panel in rendering 5 6 its decisions. So what you say here today 7 constitutes an important part of the hearing process and will be carefully examined by the 8 Panel in issuing its final order. 10 Just before we begin with the presentations, there are a couple of 11

housekeeping matters, more than anything, related to today's proceedings which I'd like to review.

These proceedings are being recorded under the supervision of the Board secretary, Ms. Blundon, and will be subsequently transcribed for the public record. In addition, presenters will be sworn in or affirmed, your choice, to make this an official part of the body of evidence before the Board. The Board's main goal is to get the facts on the record in a way that is convenient to the presenters. And while I realize this may appear certainly a little bit

minute break at that point in time and we'll come back and we'll proceed to lunch and see where we are perhaps around 12:30 or so, if that's satisfactory to everybody.

The normal practice is for the parties to be permitted to ask questions at the end of the presentations and I believe Ms. Blundon would have canvassed you on that issue and hopefully you will be prepared to answer questions. They are sometimes challenging, sometimes not. Anyway, thank you, very much.

And I'll ask Ms. Greene now to make a short presentation on the Application itself. Good morning again, Ms. Greene.

15 (9:57 a.m.)

16 GREENE, O.C.:

Q. Good morning again, Mr. Chair, Commissioner Whalen, ladies and gentlemen. 18

Hydro has filed its General Rate Application in May of this year, as you have already mentioned, requesting approval for increases in the rates charged to our three main customer groups, Newfoundland Power, Industrial Customers and our direct Rural Customers. We filed a revised Application on

Page 14 formal, we are here to listen to your views and comments and we want you to express them in a way that you feel most comfortable.

We do have, I think, in total, I counted up 14 presentations today, which certainly demonstrates a good interest in this particular Application here in Corner Brook. I think since I've been with the Board in three years going through these this is probably the largest number of presentations that we've heard in a day. So certainly, it points to a good deal of interest here, and we thank you for that.

All documents filed throughout the hearing, including daily transcripts, are available on the Board's web site and this will include a transcript of today's proceedings. And anyone wishing a hard copy may simply make your request known to Ms. Blundon and we will forward one to you as quickly as possible.

We do have a large number of presentations, as I said, and with a view to timing, it's now 10:00. I think we'll proceed to 11 or thereabouts. We may take just a ten

Page 16

August 12th to reflect direction received from the Government with respect to the rates to be charged to Rural Customers and to take into account the June decision of the Board with respect to the rates charged by Newfoundland Power to its customers.

This process is a very lengthy one as well as a complicated process. When Hydro filed its application in May of this year, it was based on financial data that was from early 2003. There are a number of significant variables that can impact the rates in a significant way such as the price of No. 6 fuel, interest rates and the load forecast are just but a few of those variables. So it was agreed during the process that Hydro would file another revised Application to reflect more current financial data. This Application or revision to the Application was filed on October 31st and it does update the financial data to more current basis and it does take into account more recent forecasts of those significant variables that impact the rates. So Hydro's proposals for rate increases that are currently before the Board have changed

Noven	nber 25, 2003 Mu	ılti-Page ^T	MNL Hydro's 2003 General Rate Application
	Page		Page 18
1 GRE	ENE, Q.C.:	1	For the Industrial Customers the base rate
2	from what was included in the May filing.	2	increase required as a result of our most
3	What I will talk about this morning are	3	recent revision on October 31st is 12.2
4	the proposals from Hydro that are currently	4	percent. For our third customer group, the
5	before the Board and they have been changed by	5	Rural Customers, Hydro is proposing the
6	the most recent filings, the most recent one	6	continuation of the current policies which
7	being October 31st.	7	were last approved by the Board in 2002.
8	Hydro's last General Rate Application was	8	Thus, for Island Interconnected Customers and
9	in 2001. And the Board issued its decision in	9	the customers served in the L'Anse au Loup
10	June of 2002 which established the principals	10	system, Hydro is proposing that the existing
11	for the current rates as well as the current	11	policy that these customers pay the same rates
12	rates themselves which became effective	12	as charged by Newfoundland Power to its
13	September 1. During the last hearing Hydro	13	customers, that that policy will continue.
14	did advise the Board and the public that it	14	The rates for these customers will therefore
15	would be filing again in 2003 as a result of	15	increase by approximately six and a half
16	new sources of supply, the costs of which are	16	percent, the same percentage increase as
17	not included in the current rates. So we had	17	forecast for Newfoundland Power's customers.
18	advised the public and the Board during the	18	With respect the Isolated Rural Customers,
19	last rate case that we would be here again in	19	Hydro is proposing the continuation of the
20	2003 seeking new rates as of January 1, 2004.	20	existing policy that these customers pay the
21	In the current Application Hydro is	21	same rates as Newfoundland Power's customers
22	proposing to increase the base rate charged to	22	for a first block of energy, which is commonly
23	Newfoundland Power as of January 1, 2004 by 12	23	referred to as the lifeline block. The
24	percent. This will result in an increase of	24	current lifeline block is 700 kilowatt hours
25	6.5 percent to Newfoundland Power's customers.	25	per month, and during the mediation process
	Page	19	Page 20
1	agreement was reached among the parties to	1	three new sources of supply, that is, Granite
2	increase this level to a seasonal level which	2	Canal and the two now power purchase contracts
3	will vary three times during the year with a	3	were required to meet the load and demands of
4	higher rate for consumption above the lifeline	4	our customers. They total over \$29 million
5	block.	5	increase in costs which Hydro is not now
6	Hydro recognizes that the increases that	6	recovering in the rates it charges its
7	it is requesting in this Application are	7	customers. And that's \$29 million of the \$50
8	significant. They are due to an increase in	8	million increase Hydro is seeking at this

10

15

16

17

18

19

20

21

22

23

24

25

I'd like now to look at the components of the increases in costs which are driving this rate Application.

The first, as I mentioned, is that Hydro has new sources of supply required to meet the load of its customers. First, approximately 18 and a half million dollars results from two new power purchase contracts with Exploits River, Hydro partnership and Corner Brook Pulp and Paper Limited. The second component of the increase is approximately \$11 million for the additional financing charges associated with the development of Granite Canal, which is a hydroelectric project developed by Hydro which came into service in this summer. These

time.

The third component of the increase in revenue requirement or in costs is fuel costs and that relates to fuel burnt at the Holyrood thermal generating plant. The Holyrood thermal generating plant located on the Avalon Peninsula supplies approximately 38 percent of Hydro's average energy capability and percent of its capacity. The increase in Hydro's No. 6 fuel costs that are forecast for 2004 even after the new projects that have come in service there is an overall increase in fuel costs of approximately \$3.1 million.

The higher costs for No. 6 fuel that have been experienced since the hearing also impact the balance in the Rate Stabilization Plan and the automatic adjustments that flow from that,

November 25, 2003 Page 21 1 GREENE, O.C.: and I'll talk about that in a moment. 2 The fourth component of the base rate 3 3 increase is depreciation and financing 4 4 charges. Increases in depreciation and 5 5 financing costs excluding those relating to 6 6 Granite Canal amount to another \$12 million 7 7 new costs for Hydro. This does include 8 8 Hydro's request to achieve a Rate of Return on 9 10 equity which is considered by Hydro and its 10 advisors to be essential to the long-term 11 11 financial integrity of Hydro. 12 12 The last component of the increase in 13 13 cost from 2002, the remaining balance of 14 14 approximately \$6 million arises from increase 15 15 16 in other costs that we call our operating 16 costs and they include such things as 17 17 maintenance for all of our plants and 18 18 facilities, insurance, professional services 19 19 and salaries. 20 20 Having looked at the reason for the 21 21 increases in costs, I would now like to very 22 22 briefly outline the main issues that are 23 23 before the Board. 24 24 The first main issue and category of 25 25 Page 23 appropriate capital structure for Hydro, the 1 1 determination of Hydro's rate base, and the 2 2 3 3

issues that I would like to refer to relates to what we call our revenue requirement or the costs. Hydro's revenue requirement has been one of the primary focuses to date in the hearings that started in early October. I have just reviewed the main reasons for the increases in the revenue requirement over that approved by the Board in 2002. Hydro has submitted detailed evidence supporting each of the categories of costs, and these costs have been examined and cross-examined by the various Intervenors. It is Hydro's submission that the costs proposed are in the context of all relevant circumstances the lowest possible that Hydro could propose consistent with reliable service for its customers.

Page 22

Page 24

The second broad category of issues that I would like to refer to now is Hydro's financial integrity. Under the Public Utilities Act and the Electric Power Control Act Hydro is entitled to earn a just and reasonable return. In this current Application Hydro is seeking a return on equity of 9.75 percent. This return is one of the issues in this hearing, as is the

appropriate capital structure for Hydro, the determination of Hydro's rate base, and the appropriate return to be earned on that rate base. And expert witnesses will be speaking to those issues next week. So these questions are all before the Board and they will have a significant impact on the rates that will flow when we receive the decision of the Board.

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

The last major category of issues that will be dealt with by the Board in the course of its decision relates to the principals to be used in the design of the specific rates to be charged to customers by Hydro. This involves the principles used in Hydro's Cost of Service Study and the design of the specific rates that flow from this Cost of Service Study.

One of the issues we include in this category are the issues arising with respect to the Rate Stabilization Plan which was introduced in 1985 following approval by the Public Utilities Board, and it was intended and it continues to be intended to lessen the impact on customers of volatility in the price and quantity of No. 6 fuel oil used at

1 Holyrood. It is like a time payment plan.

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

The balance in the Rate Stabilization Plans that are forecast for the end of this year, 2003, is \$167 million owing to Hydro by customers for electricity that customers have already used. The costs that are related to the consumption of No. 6 fuel oil has a significant impact on rates that customers pay. The costs that Hydro has incurred since the last Board decision have for No. 6 fuel oil have been considerably higher than the \$26 per barrel that was used in setting the current rates. As well, we have had less water. It has been a dry period and lower inflows into our reservoirs as well as increased customer load have affected and increased the amount of No. 6 fuel oil used and that was used in the forecast in last setting rates. So we have a larger balance in the Rate Stabilization Plan than had been anticipated in the last hearing. The balance in this plan under the existing Board order is to be recovered over a two-year period. This would have a significant impact on what

customers pay as well as the base rate

Page 25 1 GREENE, O.C.: increase that Hydro is seeking. During the course of this hearing Hydro 3 and the parties have reached agreement on 4 certain proposed amendments to the Rate 5 6 Stabilization Plan and these are now before 7 the Board for their approval. One of the things that Hydro has agreed and it is now 8 Hydro's current proposal that in order to 10 lessen the impact on customers, Hydro has agreed and proposed to the Board to extend the 11 recovery period for the current RSP balance to 12 four years from two years. This will have a 13 significant impact on the total which includes 14 the base rate increase and the RSP adjustments 15 16 that customers will pay. For Newfoundland Power customers the RSP adjustment forecast 17

> instead of the previously forecast 6 percent and the 6 percent came with the two-year recovery period. The total 2004 base rate in RSP adjustments for Newfoundland Power's customers and for our Rural Interconnected Customers will be 9.9 percent and that's the

total impact on the end user, including the

now for July 1, 2004 will be 3.1 percent

1 CHAIRMAN:

Q. Thank you, very much, Ms. Greene. Before we get started with the presentations, Ms. 3 Newman, are there any matters, preliminary 4 matters?

6 MS. NEWMAN:

Q. I just want to mention a couple of logistical 7 things, I guess. First of all, people who are 8 9 presenting shouldn't walk up through the middle because there's a series of wires here, 10 11 so if you could walk around the tables and approach from the back of the table, that's 12 the safest approach. 13

> And secondly, as the Chair mentioned, these microphones don't amplify. Can you please make every effort to speak up so that counsel and the rest of the people in the room can hear you?

And lastly, I wanted to mention, as the Chair did, that we have a tight day today, so if you could do your utmost to stick within your scheduled time so as to allow the next presenter to be relatively on schedule as we now are a few minutes behind from the start. Those are all my comments.

Page 26

base rate increase and the RSP adjustment. For Industrial Customers the increase,

including the base rate adjustment requested 3

by Hydro in this Application and the recovery 4

of the RSP balance that exists for electricity 5

already used will be 22.6 percent instead of 6

the 32.9 percent that's shown in the October 31st revision. So you can see that Hydro's

8 proposal to extend the recovery period will 10

reduce the amount that customers will pay in 2004 when the RSP adjustment is taken into 11 12

2

In conclusion, Hydro recognizes that the proposed increases are significant for its customers. It has, to the extent possible, taken action to ensure that the proposed revenue requirement is the least cost possible and it had, through its agreement with respect to the recovery of the existing RSP balances taking customers' concerns into account.

We believe that the rates that we have proposed will result in rates to customers that are the lowest possible cost that is consistent with reliable service in the current circumstances. Thank you, Mr. Chair.

Page 27

1 CHAIRMAN:

Q. Thank you, Ms. Newman. We'll begin with the

presentations. As I said, there are 14. I'll 3

just go through the first five or so and I'll 4

5 go through the others as we continue through.

The first presenter this morning is the mayor 6 7

of the City of Corner Brook, Priscilla

Boutcher; the second is Mr. Terry Locke, who's 8 the chairperson of the Humber Joint Council; 9

third is Perry Bingle, who's the chairperson 10

of the Humber Economic Development Board; 11 fourth is Mr. Mark Baldwin, who's the

12 chairperson of the Greater Corner Brook Board 13

of Trade; fifth I have here Mr. Keith Cormier. 14

15 Is Mr. Cormier here? I have a question mark?

16 MR. JEFF BURT:

17 Q. He's not here yet, Mr. Chairman.

18 CHAIRMAN:

Q. Not here yet, okay.

20 MR. JEFF BURT:

Q. He will be here by that time.

22 CHAIRMAN:

25

Q. Okay. Hopefully. So that's the first five, 23

in any event. So we'll begin. Good morning, 24

Mayor Boutcher, how are you? You presented

Page 28

2	the last time we were here and we look forward	2	I am here today on behalf of the City of
3	to your presentation again.	3	Corner Brook and the residents of theand the
4	(10:14 a.m.)	4	residents to express concerns on the impact
5	MAYOR PRISCILLA BOUTCHER (SWORN)	5	these rates increase will have on the City. I
6	CHAIRMAN:	6	will not be providing a lot of statistical
7	Q. Thank you. You may begin when you're ready.	7	information, as I am sure you have been or
8	MS. NEWMAN:	8	will be provided with this information. I
9	Q. Actually, before you begin, Mayor Boutcher, if	9	will be speaking in general terms. I have
10	I could just mention that we have a copy of	10	three major areas of concern.
11	your written presentation here that the clerk	11	Number one, the impact this will have on
12	has circulated to the parties and if we could	12	the residents and the businesses in the city.
13	identify that as PB No. 1? Thank you.	13	Number two, the impact on the City of Corner
14	EXHIBIT ENTERED AND MARKED PB NO. 1.	14	Brook and its budget. And number three, the
15	MS. BOUTCHER:	15	impact on the Corner Brook Pulp and Paper
16	A. Mr. Chairman, members of the Board, and I'd	16	Mill. I understand the original rate increase
17	like to acknowledge the CEO, Mr. Kennedy, of	17	before the Board would have resulted in
18	the City of Corner Brook, ladies and	18	increase to the customer of approximately
19	gentlemen. I would like first to thank the	19	thirteen five point percent. I also
20	Board for convening meetings here in the City	20	understand this now had been revised and the
21	of Corner Brook in response to the large	21	increase now being requested would result in
22	number of objections received from people in	22	an increase of 9.8 percent.
23	this region. I am sure you will be hearing	23	Impact on residents: The typical
24	from a lot of other interest groups expressing	24	residential consumer with electrical hot water
25	concerns about the proposed rate increase by	25	and electrical heat will have their yearly
	Page 31		Page 32
1	costs increase by approximately \$220 per year	1	costs of power charged by Newfoundland and
2	if the increase is 9.8 percent, and \$300 per	2	Labrador Hydro is being passed on the consumer
3	year if the increase is thirteen and five	3	by a general rate increase, I would urge the
4	point percent. Residents have no other option	4	Board to give a special consideration to rates
5	but to absorb any increase in costs. Many	5	charged for street lighting. Only
6	residents are not in a financial position to	6	approximately 25 percent of the rate charged
7	take increases of this magnitude, particular	7	is for the power consumed. The other 75
8	those living on fixed incomes who are in a low	8	percent is for capital costs, maintenance,
9	income bracket. I can only imagine the impact	9	etcetera. Therefore, the rate increase should
10	this will have on our hospitals, schools,	10	only apply to the 25 percent portion relative
11	etcetera, who are already running deficits.	11	to the power usage. The City has only two
12	City of Corner Brook: Currently	12	options, to either transfer this increase on
13	Newfoundland Power charges approximately	13	to the taxpayer or to absorb the cost
14	\$780,000 annually for services provided to the	14	resulting in a decrease in the level of
15	City of Corner Brook. The bulk of this,	15	services provided. Any transfer would further
16	approximately \$500,000, is paid for street	16	compound the increase I previously referred to
17	lighting. I also understand in the past the	17	for the residents of Corner Brook.
18	flow through of the rate increases from	18	Impact on the Corner Brook Pulp and Paper
19	Newfoundland and Labrador Hydro are applied	19	Mill: Where the mill is a direct purchaser of
20	across the board on all rates, including	20	power and purchases one third of its power
21	street light rates. If this is the case, a	21	requirements from Newfoundland and Labrador
22	13.5 percent increase will equate to an	22	Hydro I understand the increase will be 28. 5
23	increase of approximately \$105,000 annually	23	percent, creating a financial impact of
24	and a 9.8 percent increase will equate to	24	approximately \$5 million per annum. The mill
25	\$76,000 annually. When any increase in the	25	does not have the option to transfer this

	Page 3	9	Page 40
1 C	HAIRMAN:	1	A. I believe I have, yes. Whether it's promoted
2	Q. Thank you, very much, Mr. Locke. Questions?	2	enough that all individuals can take advantage
3 G	REENE, Q.C.:	3	of this, I don't think it has. Unfortunately,
4	Q. No questions from me, Mr. Chair.	4	the lower income people, regardless of what
5 C	HAIRMAN:	5	type of program may be offered, there's still

- 5 CHAIRMAN:
- O. Mr. Browne?
- 7 BROWNE, O.C.:
- Q. Yes. Mr. Locke, if it could be shown that 8
- savings could be made ultimately for the 9
- consumers of the province by amalgamating 10
- Newfoundland Power and Newfoundland and 11
- 12 Labrador Hydro, would the group that you
- represent have any opinion on that? 13
- A. Any amalgamation of any sort, if it proves to 14
- 15 be of benefit to the region and will decrease
- the rates or the cost to the municipalities 16
- 17 and individuals in the region, I'd say, yes,
- we would seriously look at it and hopefully 18
- 19 be, work out for all of us.
- Q. Have you heard of or have your--the people you 20
- represent heard of the climate control plan 21
- 22 for Canada and money that would be available
- through that program for people to insulate 23
- their homes and to bring down their energy 24 25
 - usages?

- type of program may be offered, there's still
- usually a cost involved. 6 Q. Well, in this particular program an assessor 7
- will come into your home, determine what your-8 -how you can reduce your energy requirements, 9
- you do the work that is suggested and he comes 10
- 11 back to make certain it is done and therefore
- your energy requirements will be lowered and a 12
- cheque will be issued to you from the 13 Government of Canada through this program. So 14
- 15
 - it is--the only initial cost is to get the
- assessor into your home. Would your members 16
- 17 be interested in promoting that in your community? 18
- 19 A. I definitely believe it would, actually.
- Again, anything that we can either get down to 20 the savings for our residents and the people 21
 - we represent is something that we would
- definitely promote for the region. 23

24

25

Q. The information can be gathered on that, by the way, by contacting your member of

24

25

13 20 organization. We are one of the provinces 14 regional economic development boards and we 15 operate in the western region otherwise known 16 as Zone 8. HEDB Incorporated is governed by a 17 17 member volunteer board from throughout the 18 region representing many sectors. The Humber 19 Economic Development Board works with over 20 20 municipalities in the region that range from 21 both sides of the Bay of Islands, Corner 22 Brook, up through the Humber Valley, extending 23 out to White Bay South. These communities, 24 most considered rural, have a combined

employ 1000 people throughout all of the zone. That amount of workers relates to even thousands more of indirect positions. When a small business, school, hospital or paper mill has a small change in their expenses, it ultimately affects the customers and employees. Prices go up, purchases go down and staff are laid off. With the proposed rate increases ranging from 9.9 percent to 28 percent, businesses will not be affected in a small way. The prices will dramatically increase, purchases

may stop, businesses may close and huge

population of over 40,000. The region has a

23 GREENE, Q.C.:

25 CHAIRMAN:

Q. I have a question.

1 MR. BINGLE: 2 numbers of people may be laid off. Then the trickle down effect will take place. Stores 3 will close, malls will empty, services like 4 restaurants will sit idle and rural corner 5 stores will not survive. The quality of life 6 7 in this region may diminish. Then throw on top of that an increase in residential 8 properties and you are only compounding the 9 10 problem. We will all be hit with that.

> People just cannot afford an increase in their expenses. People just do not have disposable income to say, I think I'll pay a little extra on my hydro bill this month because they need some extra money. People want, no, I'll say people need decreases in rates, businesses need decreases in rates, and so does industry.

I mentioned previously that many different types of businesses in the region, each one is very key to the survival of that community, whether it's a sawmill in Cormack, a shrimp plant in Jackson's Arm, an outfitting operation near Howley, the Deer Lake Regional Airport, Corner Brook Pulp and Paper and all

social and economic development. One local church told me that this rate will affect them at \$4000 a year; a rural development association expressed the concern of an extra \$1000 a year; households between 100 to 400 dollars; and of course, Corner Brook Pulp and Paper at \$5 million. The people of our province do not deserve a hydro increased forced upon them.

To quote a colleague of mine, it is said that the brightest and best have left this province. I would argue that the brightest and best must have stayed here to survive and help this province grow and prosper. If we want to keep the brightest and best here, we have to stop putting up roadblocks. Please do not allow the hydro rates to be increased. Actually, it would be a great opportunity to recommend a decrease or a cap on hydro rates and give us all a break. Thank you. 21 CHAIRMAN: Q. Thank you, Mr. Bingle. Questions? No?

of its operation or a fish plant in the Bay of Islands, they cannot handle the increased hydro rates that are proposed. Neither can the 12,450 households in our zone.

Page 46

Page 48

This area has some of the greatest winter tourism opportunities in the province. Through ski facilities, snowmobile trails and guides and many other recreational venues, Zone 8 can become the province's winter destination. And of course, it's during this season that more electricity is used at these facilities. The bottom line is that it just cannot be bottomed out any more. The potential for growth will be slowed.

Over the last couple of months I've had the opportunity and continue to do so to meet with many community and volunteer groups in their buildings and town run community centres. These groups will be another that will be adversely affected. To a volunteer group with a very limited funding, much of it through fund raising, they cannot stand the rate increases. I've done some informal, very informal surveys and checked with a couple of different organizations, including some from

Q. Oh, sorry, Ms. Greene. Yes.

2 GREENE, Q.C.:

3 Q. If the Board find that the costs are reasonable and required to serve customers, 4

how would you propose that Hydro recover the

costs if not from its customers? 6

A. Maybe it's--I'm certainly not an expert in financial affairs. And I guess my point is that it's the individual customers and all of us who will suffer. Maybe there's some way that other costs can be cut within the organization. Maybe there's some ways that as the Commissioner has mentioned, maybe there's a merger that can take place, maybe it's through public education and other ways to decrease the usage of the hydro. Q. But would you see Hydro in a loss position

- continuing? Are you aware that Hydro is losing money this year in 2003 from its regulated business?
- A. No, I wasn't aware of that fact. 21
- Q. Would you see Hydro continuing to incur losses 22

to keep--to avoid increases? 23

A. I guess Hydro is certainly, it's a business 24 and any business cannot sustain a loss, as 25

November 25, 2005 With	i-Page NL Hydro's 2005 General Rate Application
Page 49	Page 50
1 MR. BINGLE:	1 kind of just making it. They're making enough
2 I've indicated in my presentation. However,	2 to make a living for themselves and to keep
3 it's something that Isuch an organization	some people employed, and there's just not
4 shouldn't be making a huge profit either. I	4 huge profit there.
5 can't go back over, I don't know what the	5 Q. And do any of your businesses that you're
6 profits of Hydro have been over the years, but	6 acquainted with have a guaranteed Rate of
7 it just, it's something that it seems to be	7 Return?
8 that that needs to be a break even	8 A. Most definitely not.
9 organization.	9 Q. Are you aware that what Newfoundland Hydro is

1 N	MR. BALDWIN:	1	tightening exercise and dealing with the
2	means they have to do what we're all doing now	2	revenues that they currently receive, we would
3	is we have to live this new business reality	3	all be in a more positive situation. Thank
4	and they have to go through a belt tightening	4	4 you.
5	exercise. And I don't see anything wrong with	5	5 CHAIRMAN:
6	companies having to go through these exercises	6	Q. Thank you, Mr. Baldwin. Questions? No?
7	to make sure that we are more efficient and	7	7 BROWNE, Q.C.:
8	better at what we do.	8	8 Q. Yes, I have some questions.
9	So the bottom line was our group felt	ç	9 CHAIRMAN:
10	that an increase was going to seriously affect	10	Q. Oh, I'm sorry.
11	our businesses and our community. And when	11	1 BROWNE, Q.C.:
12	you're looking at a corporation such as Corner	12	Q. Mr. Baldwin, what is your business?
13	Brook Pulp and Paper and Abitibi Consolidated	13	A. I have a franchise for Dale Carnage Training
14	these corporations employ many people, I mean,	14	for Newfoundland and Labrador.
15	thousands of people in our area. If some of	15	Q. And in your business are you required to
16	these people have to move, Newfoundland and	16	borrow from time to time, do you have a line
17	Labrador Hydro and Newfoundland Power, they're	17	of credit and things of that nature?
18	going to lose customers and they're going to	18	8 A. Certainly. Most of us do.
19	lose revenue.	19	Q. Most of you do. And what interest rate do you
20	So is by increasing the rates to create a	20	normally pay on that line of credit or on your
21	strong, better bottom line, is that their	21	short-term borrowing?
22	objective? In doing that we could lose	22	A. Oh, my gosh, that's a number now that I can't
23	customers which is going to ultimately reduce	23	really quote you the number, but it's prime
24	their revenue.	24	plus two is usually the rate.
25	So we see if they go through a belt	25	Q. Prime plus two.
	Page :	59	Page 60
1	A. Prime plus one or something like that.	1	on a formula so that once the formula is in
2	Q. Yeah. Are you awareyou mentioned the Rate	2	effect there can be some adjustment at the end
3	of Return for Newfoundland Hydro, and they're	3	of the year to the formula, but other than
4	seeking a 9.75 percent Rate of Return. As a	4	that the formula is usually put in place for a
5	Crown corporation do you believe Hydro should	5	three or four year period until the board
6	be seeking a Rate of Return commensurate with	ϵ	again calls the utility before it. Are you
7	what a private utility would be receiving?	7	aware of that?
8	A. I have some issues with that, yes. I don't	8	8 A. Just run that by me again?
9	think a Crown corporation should be receiving	9	9 Q. There's a formula in place now, like
10	that type of Rate of Return as a publicly	10	Newfoundland Power is on a formula.
11	trading company or as a private business.	11	1 A. Um-hm.
12	They're owned by the taxpayers. And I	12	- 3
13	understand they had a three percent Rate of	13	at the end of each year based on Canada Bond

- at the end of each year based on Canada Bond 13
 - rates or so on to determine what the Rate of
- Return should be for that particular year. 15
- Are you aware that's a system we have now in 16
- 17 the province?
- 18 A. Briefly familiar with it, but.
- 19 Q. Are you--well, you're probably not aware of
- this then, that as part of that formula, part 20
- 21 of the formula deals with short-term interest
- 22 rates.

- 23 A. Um-hm.
- 24 Q. And what the utility, what the cost would be 25 for the utility to borrow. And if, in your

Return. I'm not suggesting that, you know,

do believe that there should be a bottom line

businesses, I have some questions about that.

9.75, a lot of our members have said they'd

love to have that kind of return. They tell

me they're not getting that kind of return.

So if they're not getting it, why should a

Crown corporation get that kind of a return?

Q. Are you aware that utilities now can be placed

Whether the Crown

they strive for a break even figure. Yes, I

corporation should be equal to other

in any business.

No	ovember 25, 2003 Multi	-Pa	ge [™] NL Hydro's 2003 General Rate Application
	Page 61		Page 62
1	BROWNE, Q.C.:	1	there's money owing between the time the Board
2	opinion, the utility comes forward and says	2	set the price of a barrel of oil at \$26 two
3	that its short-term interest rates are	3	years ago to what is owing in the Rate
4	forecast to be 5.5 percent, but then in	4	Stabilization Plan now and from previously
5	reality we find out that the short-term	5	plans we owe \$167 million for electricity
6	interest rates are 2.5 percent, the difference	6	already consumed. Do you think that's a good
7	between the 5.5 and the 2.5, should that money	7	business practice to see these amounts
8	go back to the consumers?	8	escalating to where we are today?
9	A. Certainly.	9	A. So there's a hundred andquote that number
10	Q. In reference to this particular Application,	10	again?
11	are you aware that part of the problem is with	11	Q. \$167 million owed -
12	hydrology that we only have so much hydrology	12	A. Not paid for?
13	on the island, therefore oil has to be burned	13	Q. Not paid for.
14	at the Holyrood generating station to produce	14	A. That's difficult to take. We have to be able
15	30 to 40 percent of our electricity at any	15	to run the business so thatyou know, it's
16	given time?	16	simple, something that my mom taught me a long
17	A. Yes.	17	time ago, when your expenses exceed your
18	Q. And the oil that's brought in is bunker C	18	revenue, you got trouble. So we have to be
19	fuel, which is based on American currency?	19	able to adjust it, but at whathow do we
20	A. Um-hm.	20	adjust it? Well, we have to look inside to
21	Q. And therefore, you have fluctuations in the	21	adjust it, we have to go through that belt
22	price per barrel. And the Board in this	22	tightening exercise, as I mentioned, to say,
23	particular instance has set the price of a	23	you know, where can we save some money.
24	barrel of oil previously at \$26 a barrel. Of	24	That's something that they need to do.
25	course, we never saw that, and therefore	25	Q. In reference to the \$167 million, a number of
	Page 63		Page 64
1	people have come forward and said there can't	1	Q. Do you think that's a good system?
2	be a rate increase for A, B, C, D. But how	2	A. No, that's not a good system. If I'm running
3	for A, B, C, D reasons. But how do you	3	a business and I am responsible to
4	suggest \$167 million be paid for? Hydro has	4	shareholders and I go over an expenditure that
5	borrowed the money.	5	amount of money, I'd certainly questionI'd
6	A. Um-hm.	6	certainly be questioned if I was running the
7	Q. Essentially, and they're paying interest on	7	organization. I'd certainlyit would be very
8	it. And now they're coming to the Board to	8	difficult for me to go back to the consumer
9	look for that to be paid. So you see part of	9	and say, all right, you know what, we made a
10	the big dilemma here is for past electricity	10	big mistake and now we have to gouge you for
11	used we owe 167 million.	11	it. We should be able to look within. As I
12	A. Not a good practice. You know, we should be	12	just mentioned, that we have to go through
13	able toI don't really get it, I'll confess.	13	either conserving measures, as was brought up,
14	The \$167,000 that -	14	informing the public of a lot more
15	Q. 167 million.	15	conservation efforts, to say you know what,
16	A. \$167 million that they have spent and now	16	because we spent this, we're not going to
17	they're looking for the consumers to pay for	17	overcharge you, but we've going to ask you to
18	it?	18	reduce the usage. If that was done, we could
19	Q. Yes. And the consumers were never notified	19	accept it a little more. To say that we're
20	that \$167 millionof the escalation, so	20	just going to be increased, the rate increased
21	consumers didn't have the opportunity to	21	just to accept and the rate increase is going
22	conserve, and now they're coming forward to	22	to pay for the mistakes of the past, no,
100	1 - 1 - f - u u u - u - u - u - u - f - u 1 - 1 - 1 - u - u - f	100	41-47-444-4444

23

24

25

Q. So you think that the Board has a

responsibility to ensure that the utility is

that's not a good thing.

look for consumers to pay for that amount of

23

24

25

money.

A. If I'm running -

November 25, 2003 Mul	ti-Pa	nge [™] NL Hydro's 2003 General Rate Application
Page 6	5	Page 66
1 BROWNE, Q.C.:	1	ready.
2 advising the consumers -	2	MR. BURT:
3 A. Absolutely.	3	A. I've got a brief statement which I'm going to
4 Q of what is happening here?	4	read. My name is Jeff Burt. I'm the
5 A. Absolutely.	5	chairperson of the Corner Brook Downtown
6 Q. Okay. These are my questions. Thank you,	6	Business Association. The statement that I'm
7 sir.	7	going to read is a reflection of the executive
8 A. Thank you for clarifying the question.	8	of the board of our association.
9 CHAIRMAN:	9	And it's interesting that I was next door
10 Q. Thank you, Mr. Baldwin. It's five to 11. I'm	10	last evening and I was talking to Dr. Axel
going to hopefully proceed with one more	11	Meisen and he asked me what was going on and I
presenter and then we'll take a break. Is Mr.	12	mentioned this hearing here today. And he was
Cormier here now? No? Okay. I guess the	13	kind of inquisitive as to what it was all
next five that I have here, Mr. Burt, Jeff	14	about. And I said, well, actually, it's quite
Burt, who's with the Corner Brook Downtown	15	frustrating. And his comment to me was is it
Business Association. Good morning, Mr. Burt.	16	frustrating because of the complexity of the
17 How are you doing?	17	Hydro application. And my response back to
18 MR. BURT:	18	him was, actually, it's frustrating because of
19 Q. How are you?	19	the simplicity of how business views this
20 CHAIRMAN:	20	situation. And the three points I'm going to
21 Q. Good, thank you.	21	outline will identify why we say it's very
22 (10:53 a.m.)	22	simple.
23 MR. JEFF BURT (SWORN)	23	Our concern is on three fronts. The
24 CHAIRMAN:	24	first one is the desire to increase profits
25 Q. Thank you, sir. You can proceed when you're	25	from approximately three percent to 9.75
Page 6	7	Page 68
1 percent. Merriam Webster dictionary defines a	1	you just take that from one employer and then
2 tax as a charge usually of money imposed by	2	you add it to other employers in this local
authority on persons or property for public	3	area of, I guess, there's a difference between
4 purposes or a sum levied on members of an	4	what Corner Brook Pulp and Paper will be
5 organization to defray expenses, or point two	5	levied versus other business, the multiplier
6 is a heavy demand.	6	effect is very, very substantial from our
7 The primary issue with this profit	7	point of view.
8 increase is that the flow through of the	8	Newfoundland and Labrador Hydro says as a
9 additional revenues will ultimately come from	9	business they have a right to expect a

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

additional revenues will ultimately come from the general public and be redistributed back into the same general public in some form or another. Just with Corner Brook Pulp and Paper, for example, the exact amounts extracted could be as much as \$5 million plus the tax multiplier effect. Because any time you extra dollars from anywhere and it's suitable tax or in the form of something like a tax there's a multiplier effect and the multiplier factor typically could be as high as 70 percent. So the \$5 million of the Corner Brook Pulp and Paper could actually be an impact in the Corner Brook area of as much as eight and a half million dollars, and that's quite an impact from this very small

area from an economic point of view. So when

business they have a right to expect a reasonable Rate of Return. And as a business group, we would normally agree with this point. But what business has the ability to increase profits in today's world by saying they want more and just increasing the cost to the customers and not giving them any more back for that? What business desires to increase profits from the customers and then dividend less of those same dollars back? What we mean by that statement is ultimately any dollars, additional revenues collected by Hydro are going to go back into Hydro and then dividend to the government and then redistributed back to the population itself. Typically when dollars go back through that type of process there's inefficiencies,

November 25, 2003 Page 69 1 MR. BURT: 1 2 there's dollars lost, so you're going to take 2 dollars back from consumers and distribute 3 3 less to them. So that's a definite negative 4 4 impact from our point of view. 5 5 6 There was questions in the last presenter 6 7 that centred around the Rate Stabilization 7 Plan. It's the second point is concerning 8 8 that plan. It's our understanding that part 10 of the rational behind this increase is to pay 10 off the new 60 to 70 million dollars of this 11 11 12 current program. They already have \$100 12 13 million that they've set aside that they're 13 trying to pay off over the last five years--14 14 over the next five years, they put a five-year frame? 15 15 16 term on this \$100 million. Apparently this 16 deficit occurs through variations in costs 17 17 from supplying electricity to the customers. 18 18 Obviously it's the cost of crude and other 19 19 inputs that allow them to generate electricity 20 20 from other than the hydro, I guess, sources 21 21 that they currently have from Labrador, 22 22 etcetera. But the intent to pay off this new 23 23 Rate Stabilization Plan is now subject to a 24 24 two-year term. So from a business point of 25 25 Page 71 justifying their profit increase and because 1 1 of the time frames which they are choosing to 2 2 3 put on its Rate Stabilization Plan. We would 3 then question what are their costing models 4 4 5 and what is their amortization periods for 5 6

view, in the real business world, when you have negative cost variations in your business, you have to deal with that debt, but you typically try to stretch that over a reasonable period of time. You don't take it and squeeze it into a two-year time frame. And also, you never have the luxury of just going back to your customers and asking for a price increase to cover off that additional revenue requirement. It's just not the real world business. So we're asking what business model exists where whenever you have cost challenges, you have the ability to put it totally on your customers over a narrow time

Page 70

Page 72

The third point, my understanding is for this increase is they're looking for new sources of power. And our association supports any expansion to increase power generation. Obviously that would then mean that there's an indication of additional business demand or businesses out there that require this electricity. However, we have concerns because of the thought process as to how Newfoundland and Labrador Hydro are

these new sources of power. Are they going to put a new source of power on stream and say, okay, we just acquired this X million dollar piece of power generation situation and then turn around and amortize it over a five-year period when the useful life for that particular power generation could be 20 years? Normal business would run it over 20 years, not five years. We don't know these models.

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

So from a Corner Brook Pulp and Paper point of view, the paper business has to deal with global prices in a commodity market, they have currency issues, just as Hydro does, but Hydro actually is in a positive mode now because they're buying US dollar crude with a higher Canadian dollar, so that's actually an offset. But the paper business is going the other way. Their production is in Canadian dollars and they're actually turning around and selling in the US market. So, they're

into a market where the demand is derived globally on a cost basis, it's a commodity market, and so as a result they have to compete on a cost basis, because there's really no differentiation when it comes down to between one set of paper production versus 6 7 another. So, when cost basis is a primary 8 factor that allows a business to make or to 9 lose, it's the biggest thing that you look at in your bottom line, where are your costs 10 coming from. So any unnecessary cost increase 11 based on questionable rational would affect 12 thousands of businesses and households here in 13 the Corner Brook area. 14

> As Newfoundlanders it seems we struggle to compete every day. Why we would allow, and this is for lack of a better term, a pseudo business that has such a potential for negative impact is a question that you as a Board will have to decide. Thank you.

21 CHAIRMAN:

15

16

17

18

19

20

22 Q. Thank you, Mr. Burt. Questions? No? Mr. Browne?

23

24 BROWNE, O.C.:

Q. In terms of other forms of energy, you

	· · · · · · · · · · · · · · · · · · ·		, II
1	Page 73		Page 74
1	BROWNE, Q.C.:	1	Hydro to acquire Newfoundland Power in the
2	mentioned that in part of your presentation,	2	open market, from my point of view. So that's
3	are you aware that Hydro has a plan in place	3	something that you may want to look at down
4	for a project in partnership with private	4	the road, but right now as it sits, I don't
5	enterprise for wind power generation on the	5	see that occurring though.
6	Burin Peninsula?	6	Q. If it could be shown that the cost in savings
7	A. I justother than what was in this morning's	7	itself would allow for the acquisition, would
8	paper on wind generation, I have no knowledge	8	that change your mind?
9	of it.	9	A. The bottom line could be potentially proven in
10	Q. Would you advocate that if it could assist in	10	one respect or another. But then you've got
11	bringing down rates ultimately?	11	to have the willingness of the shareholders of
12	A. Absolutely.	12	Fortis to allow that to happen. Whether
13	Q. Would you advocate the merger of the two	13	that'll occur or not is an entirely different
14	utilities if that could show efficiencies and	14	situation.
15	bring down rates ultimately?	15	Q. Do you think the merged company should be a
16	A. Are you referring to Hydro and Newfoundland	16	public corporation or a private corporation?
17	Power?	17	A. Private.
18	Q. Yes.	18	Q. If it could be shown that a private
19	A. I have difficulties with that in that you're	19	corporation could more efficiently handle the
20	merging a Crown corporation versus a private	20	interest of the province, would you be in
21	corporation. You're talking about either	21	favour of integrating the Crown into a private
22	Newfoundland Power acquires Hydro or Hydro	22	corporation?
23	acquires Newfoundland Power. The cost from a	23	A. Absolutely.
24	taxpayer point of view at this point in time,	24	Q. Thank you. These are my questions.
25	given our current deficit, would not allow	25	A. Okay.
	Page 75		Page 76

2 back can hear her and then she can move back	2	What Hydro is now proposing and what is before
3 to her usual spot?	3	the Board with respect to what we call the
4 CHAIRMAN:	4	base rate increase, which is the increase in
5 Q. Right.	5	our cost that we are trying to recover as well
6 GREENE, Q.C.:	6	as the other issues such as the Rate of
7 Q. But I won't be sworn.	7	Return. The base rate increase for
8 BROWNE, Q.C.:	8	Newfoundland Power is 12 percent and
9 Q. Maybe we can ask her some questions.	9	Newfoundland Power flows this through their
10 GREENE, Q.C.:	10	costs and that will result in an increase at
Q. I understand people are having trouble hearing	11	the end consumer level of six and a half
me, so I'm going to speaksit here and turn	12	percent. For Industrial Customers from which
this way, so hopefully the Board can hear me	13	Mr. Hutchings is representing here today, the
as well as the audience. If you can't hear me	14	increase we are looking for in base rates is
in the back of the room, could you wave your	15	12.2 percent.
hand? All right, so you can hear.	16	In addition to that we have the RSP. And
Mr. Browne has asked us to clarify what	17	I did need to spend a moment explaining the
the increases are. And as I mentioned, this	18	RSP because I believe there was a wrong
is a very lengthy complicated process. When	19	impression left with respect to one of the
we filed in May, it was based on data for the	20	presenters and the questions arising from the
end of 2002 and forecast at that time. We are	21	Consumer Advocate. The RSP was implemented in
now here almost a year later and the Board had	22	1986 following a hearing before the Board. At
asked us to file an update. So the numbers	23	that time we had a fuel adjustment charge
have changed from what was in the original May	24	where we immediately passed on to consumers
25 filing as a result of the revisions. There	25	the increase in the price of No. 6 fuel oil
Page 79		Page 80
that we had paid in the previous month. And I	1	Stabilization Plan which started new on
2 don't know how many of you remember it, but I	2	September 1, 2002. Because the price of fuel
3 remember it well because I was involved. We	3	has been much higher than used in setting the

that we had paid in the previous month. And I don't know how many of you remember it, but remember it well because I was involved. We actually had protests from some of our customers with respect to the spikes in the prices they were paying during the winter months. So this was proposed as a way of smoothing out over time the No. 6 fuel price cost associated with Holyrood. And you heard me say this morning that Holyrood is required to supply base load for the province. So the Rate Stabilization Plan was introduced to smooth the impact for customers of increases in the price of No. 6 fuel and the quantities of No. 6 fuel primarily. There are a couple of other minor things in there that I'm not going to get into here this morning.

So the RSP at the last hearing it had worked relatively well up until the last hearing when at the time of the hearing there was a balance of the old RSP of approximately \$120 million. The Board at that time said that that balance would be frozen and recovered over five years, but the Board still approved the continuation of a Rate

Stabilization Plan which started new on September 1, 2002. Because the price of fuel has been much higher than used in setting the rates at that time, a balance has built up in that plan which the Board knew about and it has been part of the system which has been deferred into an account that we will be recovering over time and there are automatic adjustments, January 1 each year for industry, July 1 each year for the residential customer to recover the difference between the actual price we have paid for the fuel that we have burnt and what is in base rates. The additional amount we're forecasting for the new plan is roughly \$73 million.

So we have right now, because we've had a one-year reduction in the old plan, \$167 million owing from customers for this fuel that we've already used as a mechanism--I can remember this morning I called it time payment plan, and that's what it is. The customers have used the product and we have been authorized to recover it over a period of time. It is not that we didn't know the amount, it is not that we made an error, it is

140 Vehiber 25, 2005	iuiu-i age 11L ffyufu 8 2003 General Kate Application
Page	Page 82
1 GREENE, Q.C.:	the end consumer level they will be paying,
2 the way that the system was set up as part of	2 including the RSP adjustment, 9.9 percent more
3 the rate since 1986.	3 in 2004 over 2003.
4 So that isI don't know if that's	4 For Industrial Customers, when you add on
5 helpful or if you have any questions.	5 their RSP adjustment, because they owe 44.4
6 BROWNE, Q.C.:	6 million of the 167 million, their adjustment
7 Q. I got a question. What's the percentage of	7 will be 22.6 percent. So that includes the
8 the 167 million? We got 6.5 percent that	base rate adjustment that we are asking for in
9 Newfoundland Power customers will pay, but	9 this rate case, plus the automatic recovery of
when you put in the 167 million that's owing -	the RSP balance for the fuel that has already
11 GREENE, Q.C.:	been burnt.
12 Q. Oh, yes -	So those are the increases including base
13 BROWNE, Q.C.:	rate and RSP in 2004. And -
14 Q what goes on top of that?	14 BROWNE, Q.C.:
15 GREENE, Q.C.:	15 Q. So the total amount Newfoundland Power's
Q. On the RSP to recover this over the four-year	customers will pay if the increase goes ahead

purchased power supports about one third of our production of approximately 1200 metric tonnes a day, roughly 400 metric tonnes a day for this one third power, an area the size of the production of the Abitibi Consolidated Stephenville mill.

Page 90

Page 92

At yesterday's hearing in Stephenville one presenter mentioned that the Hydro costs at the Stephenville mill is approximately \$20 million annually. Our own purchase power cost at Corner Brook meet or exceed this number. And again, I'm only quoting what a presenter said in terms of the actual costs at Abitibi. To further put purchased power at our mill in perspective, it has been suggested to me that our power requirements that we purchase are probably equivalent to all of the purchased power of all the households in Corner Brook, in the Corner Brook area. So our requirement is quite extensive. It's just a factor of the nature of the business we're in, the machinery and the equipment that we drive.

Again, electricity represents a significant component of our mill's overall cost, a cost we have few opportunities to

offset, if we want to maintain or expand current production levels and we want to maintain and expand current employment levels.

Suppliers in many sectors have the ability to pass cost increases to their customers. Our mill has no ready ability to affect prices in world markets. Newsprint is a commodity, pricing is determined by supply and demand on a global basis. Our mill competes internally and globally. Our success depends not on our ability to affect prices, but on our ability to control our own costs. The proposed Hydro rate increase will be devastating to us in this regard.

The continued success of our mill is crucial for its employees, the City of Corner Brook and surrounding area. Businesses, many of whom we heard from this morning, and residents in more than 40 communities in which our employees reside. The Corner Brook mill, it was already mentioned this morning, I believe, supports 1100 plus direct jobs in plant and woodlands operations, provides an annual payroll of \$63 million, purchases goods and service in this province alone in excess

of \$110 million annually, spends overall in excess of \$210 million annually in normal years. Since 1985 we've spent about \$600 million, plus \$600 million in various modernization programs related to production and environmental areas to make our mill competitive. The mill provides more than 30 million annually in various grants and taxes to municipal, provincial and federal governments.

In the late 1990s I was involved with the Marine Advisory Board in Newfoundland and also I had the opportunity to make a presentation to the Standing Committee on Transportation.

At that time I pulled together some facts and figures about our industry in Corner Brook and I also included some information I had received from Abitibi Consolidated about the impact in terms of employees and so forth of the three operations. At that time our combined payrolls were about 133 million, representing 3000 plus direct jobs in the three mills and likely supporting at that time an additional 8000 to 10,000 indirect jobs in various sectors in many communities. Also at

9	energy, whether it's heat generated through my	9	this might be, this message might get out a
10		10	little clear and more succinctly?
1	BROWNE, Q.C.:	11	A. One suggestion would be to take advantage of
12	Q. Should the utilities be instructed by the	12	the various organizations, the service groups
13		13	around. I sat in Stephenville and people
14		14	said, yeah, we'd be interested in that
1:		15	program, that educational program. I'm sure
10	be appropriate. I'm not sure if it is, but if	16	here the various organizations, we have the
1	75	17	Great Humber Joint Council today with numerous
18		18	members throughout. Charge those groups with
19	proactive and detailed approach be taken to	19	the responsibility of helping spread the
20	educate people, I think that would be a good	20	message about conservation in terms of
2		21	electricity and other fuels. I think that
22	Q. Thank you, Mr. Mitchell.	22	would be a great approach. If there's
23	•	23	anything we can do with our own employees at
24	4 CHAIRMAN:	24	our mill, we have a large number of employees,
2	Q. Thank you. Mr. Mitchell, you did notice or	25	if there's something that we could do by way
	Page 103		Page 104
	of an educational program to help them	1	A. Good morning. How are you this morning?
1 2	conserve energy because, when I think about	2 CH	IAIRMAN:
1	this, ladies and gentlemen, at the mill here,	3	Q. Good, thanks.
4	I mean, what's going on here today is very	4 (1)	1:54 a.m.)
:	important for all of us. If we can make a	5 MF	R. KEITH CORMIER (SWORN)
(contribution at home by conserving power to	6 CH	IAIRMAN:
'	help save our own livelihoods, that would be a	7	Q. When you're ready, you may proceed.
Ι.			

very positive thing to do. So there's another

opportunity that we would certainly be glad to 9 do it. And I'm not going to speak for 10

11 Abitibi, but Mel is here and I would bet you

Abitibi would also get involved in educating

13 people about the importance of conserving 14

energy in light of the very issue we're 15 talking about today. Those are just some

ideas on how to get this thing moving forward 16

17 in a bigger way with more widespread coverage.

Q. Thank you, very much and thank you for the 18 19 initiative you've taken as a private

individual in coming forward today, thank you, 20

21 and yesterday. 22

A. Thank you. You're very welcome.

Q. Next will be Mr. Keith Cormier. Mr. Cormier, 23 24 please? Good morning, Mr. Cormier.

25 MR. CORMIER:

8

12

8 MR. CORMIER:

A. Well, I would first off like to welcome the Board and all the visitors to our beautify 10 11 City of Corner Brook on the west coast of Newfoundland. I'm here again as a private 12 13

citizen.

14

15

16

17

23

24

25

I am a volunteer chair with the Corner Brook Economic Development Corporation. It is a volunteer board made up of business people, academics, some retired people, the mayor's ex officio and one city councillor. And we were formed many years ago by the City of Corner Brook to foster economic development in the greater Corner Brook area, more specifically, in Corner Brook in general.

And I'm here not to pick at the numbers, per se, of the Annual Report or the Application per se, although I have had a look

Page 105 1 MR. CORMIER: at them. I'm here as the chair of economic development because we view hydro as almost 3 like a necessary public service. It is a 4 pillar when we go looking for economic 5 development of any type for the City of Corner 6 7 Brook. It is almost like a public service. It is not--it shouldn't, in our view, be a for 8 profit organization. And although it's 10 important in the delivery of hydro right across the province, I think it--we view it as 11 a service to the citizens of this province. 12 13

And I ask the question is it really fair to ask the citizens of the province to continually come up with more money to supply--how can I word it diplomatically, Chinese dollars to the provincial taxpayers. I looked at the report and I saw a deficit, including CF(L)Co somewheres around \$2 billion. Yet, in the last four or five years, Hydro has carved off about \$285 million as dividends back to the province. But the debt hasn't changed much. It hasn't gone down a significant amount of money in the last four or five years. So, is that really fostering economic development,

Page 107

it, and (c), I couldn't find anywhere in the Annual Report was the cost of overhauling that aircraft in 2002 amortized totally in 2002 or was it spread over a significant period of time or was it just part of the general expenses last year. It's--you know, I couldn't pick it out. And I almost thought it was the same sort of process that the Provincial Government used in the budgeting process. We have one process for the budget and real dollars when it came down to the crunch and reporting back to the citizens of the province. That's just a view.

I'm not going to spend too much time speaking to the cause of Corner Brook Pulp and Paper. I thought Mr. Mitchell did an excellent job and they're more aptly qualified to speak to how it impacts their business. But I will say as economic development the Corner Brook Pulp and Paper is a very vital part of the ongoing industry and ongoing economic growth in the City of Corner Brook.

And I simply looked at, you know, if you had one budget item, and Brendan spoke to someone coming in his office and saying the not only just for--not for Hydro, but for the business community in the Province of Newfoundland and Labrador.

Page 106

Page 108

Statistics are a bit like lampposts. I'm a business person. And basically lampposts have two specific purposes in life to exist. One is to illuminate an area and the other one is to lean on them. And when looking at some of the numbers, I think Hydro may be leaning on the lamppost and not using it to illuminate an area to give us a more clearer picture.

You know, on just one item--I'm sure the Consumer Advocate is more qualified and has spent a lot more time looking at detailed numbers within Hydro's Application and at their Annual Report. But I looked at part of their expenses in 2002 was a complete overhaul of their CF(L)Co's aircraft. I look at a province with \$690 million deficit, current deficit last year, I look at a Crown corporation that's \$2 billion in debt, including CF(L)Co and I'm asking myself as a citizen of the Province of Newfoundland and Labrador does this organization (a) need an airplane, and (b), does it need to overhaul

price of this has gone up. And they buy a lot of stuff. But if I looked at my own personal situation, and someone said to me tomorrow, because I just bought a new house, by the way, next year your mortgage payment has gone up by 28 percent, how would that impact me. How would that impact you, sir, if one particular major chunk of your operations in your own personal life arbitrarily was increased by a certain amount? How would that affect your ability to fund children's education? And in their case, how do they fund employee benefits costs, how do the fund capital expenditures in their own organization?

Brendan spoke about way back in 1923 when they built the mill, and I didn't have this in my speech, but they brought it back to memory that my grandfather, Joe Cormier, worked as a foreman when they built the mill in 1923. And I remember the phrase in growing up, "put the hum in the Humber". And God forbid if we ever take the hum out of the Humber, because as much as we as an economic development corporation are trying to diversify the City of Corner Brook with educational

	3 excellence designation, research money, make	3	that process. And I thank you, very much.
	4 no mistake about it, folks, that mill down	4	CHAIRMAN:
	5 there is a vital, vital component to the City	5	Q. Thank you, very much, Mr. Cormier.
	of Corner Brook and the west coast of	6	GREENE, Q.C.:
	7 Newfoundland. And a major increase like this	7	Q. Yes, Mr. Cormier, I have onea couple of
	8 is going to have very, very big impact on	8	questions to clarify for the record. You
	9 their bottom line and their ability to stay	9	mentioned expenses associated with Churchill
	· · · · · · · · · · · · · · · · · · ·	10	Falls, Labrador Corporation Limited. And I
		11	wanted to ask you, are you aware that what the
	·	12	Board is reviewing in this Application is what
	1	13	we call Hydro's regulated business which is
		14	the supply of electricity to consumers in the
	_	15	Province of Newfoundland?
		16	A. Yes, I am. Does CF(L)Co provide any hydro to
		17	Hydro to sell in the Province of Newfoundland?
	I - I	18	Q. Are you awarethe answer to the question is
	1	19	yes -
	·	20	A. Is yes, I'm aware.
	I	21	Q. And that the expense that Hydro pays is only
	1	22	for purchase power expense, and are you aware
	1	23	that that is tied to a power contract between
	I	24	CF(L)Co and Hydro Quebec?
		25	A. Yes.
	Page 111		Page 112
	1 Q. Okay. So that the expenses related to	1	renovate. But anyway, go ahead.
	2 Churchill Falls Labrador Corporation Limited,	2	Q. And you're going to renovate. Is that house-
	3 whether it is a salary cost for employees who	3	how is it heated, by electricity or -
	4 operate the plant in Churchill Falls or	4	A. Electricity.
	5 whether it's for an aircraft are not included	5	Q. Electricity. Is it baseboard electric?
	6 in any of the expenses before the Board and	6	A. Baseboard electric.
	7 that's one part of Hydro's rates.	7	Q. Are you aware if you have baseboard electric
	8 A. Okay. So let's take CF(L)Co out of it and go	8	radiation in your home, that you could be
	9 back to the \$1.6 billion dollars worth of debt	9	losing up to 30 or 40 percent through the
	I	10	exterior walls?
	l	11	A. I'm probably losing a lot more than that
	l	12	because the house is over 40 years old.
	l	13	Q. And does it make sense to you that we have a
		14	system where we burn oil at Holyrood, okay, to
	1	15	produce electricity, so we got oil,
		16	electricity, so people can have electric heat
	1 0	17	in their homes? Wouldn't it make more sense
	, , , , , , , , , , , , , , , , , , ,	18	if people put their own furnace in their homes
		19	and burn their own oil, wouldn't that be a
		20	more -
	1	21	A. I don't know the answer to that. Obviously
	22 BROWNE, Q.C.:	22	one's preference to heat one's home is one's

24

25

preference. I mean, if I had my preference,

I'd love to, if I could afford it and amortize

it, to have hot water radiation heat which is

a new house?

23

24

25

Q. Yes. Mr. Cormier, you just stated you bought

A. I bought an older house that I'm going to

1 MR. CORMIER: 2 and now you can do it with electricity which 3 apparently is almost as efficient as oil, if 4 you use hot water radiation with in-floor 5 radiation heat. So I don't know if it makes 6 sense. We have to generate electricity in the 6 Province of NewBoundland somehow. We don't 8 have enough water flowing through enough 9 gorges to generate enough electricity so we 11 have some of the lowest electricity rates in 12 Q. You mentioned in your evidence that here we 13 have some of the lowest electricity rates in 14 Atlantic Canada. But is that a true 15 comparison where we have up to 60 to 70 16 percent of our electricity is produced by 17 hydrology whereas if you look to Nova Scotia, 18 they use coal for the most part to provide 19 electricity to the consumers there. If you 20 look to New Brunswick, they have the Point 21 LeClair - 22 A. Nuclear station. 23 Q. ouclar station. We look to PEI, there's 24 very little there by way of hydrology. So 25 shouldn't we naturally be cheaper because we 26 corporation is currently in the process of 27 dedding if the Port of Cormer Brook Port 28 operator on a viable business basis if and when 29 we take over ownership of the port's assets, 30 hopefully sometime early in 2004. At the 31 likely cost associated with port operations, 32 from 2004 onward for ten years. 33 from 2004 onward for ten years. 34 As we are sure you can appreciate, we are 35 very not supplied the component of the port of corner Brook very the sent in the process of 36 deciding if the Port of Cormer Brook can 37 operate on a viable business basis if and when 38 we take over ownership of the port's 39 as a province of the lowest electricity in the transition of the port of the composition is currently in the process of 39 deciding if the Port of Cormer Brook can 40 operate on a viable business basis if and when 41 we take over ownership of the port's assets, 42 of the port of Cormer Brook can 43 operation in jeogardy, especially when the 44 corporation is currently in the process of 45 decidi	No	vember 25, 2003 Mult	i-Pa	age™NL Hydro's 2003 General Rate Application

At the present time we are involved in conducting our essential due diligence work, including calculating the freight volume throughout and likely cost associated with port operations from 2004 onward for ten years. As we are sure you can appreciate, we are very anxious to be able to rely on the volume from 2004 onward shipped via ocean containers and amanufactured by this important local economic generator in jeopardy, especially when the current Canadian dollar is valued so highly against the American dollar. These two events, when combined, present a serious concern to us as far as onward high newsprint paper production and exports by ocean freight. We ask that the Panel give serious consideration to our concern on this front as you seek to rule on the proposed industrial rate increase application. So to is the proposed commercial rate of deep concern to us. If we are to acquire the assets of the Port of Corner Brook next year, one of the first matters we will have to	2	Q. Okay.	2	
corporation. One being the Corner Brook Port Corporation is currently in the process of deciding if the Port of Corner Brook can operate on a viable business basis if and when we take over ownership of the port's assets, hopefully sometime early in 2004. If I went in to Brendan's office next week and said, Brendan, here's a 22.6 percent increase, I'd be out of business. You know, he wouldn't accept it. There's other carriers he would use. But, increases are inevitable. We all have to have increases, you know. Every year we like to see our salaries go up, we like the bottom	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	And we feel that for myself as in the community here, you know, the Board should look at that. It should look at what effect that will do to business. Will it, you know, will it keep business running or will it put business, small business out of business. And I feel like there is a lot of business out there now, as it was brought up earlier, that the bottom line is not nine percent that they're making profit, it's more in the line of two and three percent. And you know, this kind of increase could put them out of business and just drive people out of Newfoundland. And I guess that's about it. Thank you. Q. Thank you, very much, Mr. Barnes. Questions? Mr. Browne, do you have any questions?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	our deliveries, less freight. And the spin off to even the customers, you know, like other business in the community, the cuts. So I guess what I'm trying to say is it would trickle down to lay offs, less people working and would come down to, you know, more people unemployed or moving out of the province. Increases in the industry is something that we all live with. As Brendan said, suppliers come in. If I went in to Brendan's office next week and said, Brendan, here's a 22.6 percent increase, I'd be out of business. You know, he wouldn't accept it. There's other carriers he would use. But, increases are inevitable. We all have to have increases, you know. Every year we like to see our salaries go up, we like the bottom line to the company I manage, we like to see	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	And we feel that for myself as in the community here, you know, the Board should look at that. In every mill I've worked for mills, paper mills strive, as most businesses do, to be a low cost producer. And one way for the paper industry is that with fixed costs like fixed number of head count on our payroll there's other fixed costs as well, like fabrics for paper machines, for example. The idea is that we grow the mill as much as we can so the ratio of fixed costs is diminished. And the trick for our industry is to be among the low cost producers so that if there's a downturn, we can survive, survive that. And I know there's a fair amount of talk about down sizing. That's a distinct possibility with

I should say and it was pointed out by a few people that our markets are international, so we sell to England, for example, other countries in Europe, and we sell a lot of our product to the United States.

And to give you an example of the competition, I was in London about a month ago visiting one of our major customers and there I saw paper from Russia, I saw paper from a very modern mill in England. And I pick those two out as examples because I always had the impression that if it came from Russia, the quality must be not all that good so we'd have an advantage there. But, I found that I was just kidding myself because the pressroom said that really in that particular pressroom now that's one of their best suppliers in terms of runability and quality and furthermore, they

the extra power costs because I believe that

most vulnerable people that we have now are people in fixed incomes, low wage earners, seasonal workers and people living in their homes trying to maintain and stay warm in their own houses, which our governments want us to try and do.

And within the last five years--I have to take you back a little bit in history to bring you up to today. Within the last five years inflation has eroded what little buying power people in this category had. The cost of housing, food, taxes, heating, transportation and one of the big ones that happened in the past is insurance has eroded what little buying power people had in the past. And there's no escalator clause built into any of the programs that we have to keep even with

morning, Mr. Hann. How are you this morning?

Q. Okay.

A. Good morning, sir.

18 MR. ISREAL HANN (SWORN)

A. Oh, not quite sir.

today. Is that correct?

Q. Or this afternoon I guess it is now.

A. I knew you were going to save the best for

Q. Thank you, very much. And welcome, sir. I

understand you're here on your own behalf

last and I sat back and just took it easy.

1 MR. HANN: the inflated rate. Inflation goes up and there is nothing we can do, we don't have any increase. And I'm speaking as "we" as a senior myself. The cost of everything that goes up affects everybody in this area, especially people on low income, one family parent trying to maintain a house and educate he children or his children. And that are the people that are most affected by any increase.

And if Hydro gets its nine and a half percent which we thought this morning was six and a half, now it's nine and a half percent, where do we cut back to compensate for that? The only thing I can see right now is after knowing every household in this area, I've been to their door, and I know the conditions people live under. And we're going to take away 12 litres of milk on that nine and a half percent increase. You may shake your head and you may nod your head, but that's what it amounts to.

People can't afford the increase. Where do they get the money to cover the increase? Their pensions don't go up, the government

don't come out and say I'm going to raise the minimum wage, no, none of those things happens. But you have to have heat in your home, you have to have lights in your home and you have to use certain things, washers and dryers and things like this. So you can't cut back on that. But you got to take food from the table. Municipalities still want their taxes, that has to be paid or somebody's going to put a lien on your home. So you cut back on food. And if you have medical conditions, you can't cut back on drugs. Drugs have skyrocketed within the last five years also. We have no control over those because they have a monopoly now in Canada that they can do what they like. If we had control, maybe there was some things we could do. So we have to cut back on food.

Page 138

Page 140

What else do we cut back on? The milk is gone from the table. Now we have to watch the sales and go get tomato soup because that's about all we will afford. And by doing that, what do we do with the Wellness Program that was introduced by the government? They want us to live under the Wellness Program, which

Page 139

Page 137

is eat within the Canada Food Guide. So you've taken that away. Now our children is going to rely more on school programs when they go to school hungry in the morning. They have to be fed. What way to do we feed them? We have to rely on the school programs. The parents, to keep the house going, they have to rely more on the food banks. And I know all about the food banks because I was involved with that also, and it's a bigger demand now on those food banks and those school programs than ever we had before.

And people say, oh, how can you educate the public. Well, we can start by having a good education program. By not turning on Christmas lights at Halloween, not keeping them on all winter because it satisfies the provider for electricity. He's only too glad to see you have them on. Now, people will say, oh, they don't burn a lot of electricity. But if you got 10,000 houses burning Christmas tree lights from October up to January, and in this area we're told to keep them on until Carnival Week, that's up in February. So we have to start educating people too. So what

do we do now in order to conserve electricity? Do we start going to bed 9:00 or 8:00 and turning off the lights?

We all know the problem, we all know we has to conserve and we all know the rate increases may be justified, but where are you going to get the rate increases from those type of people? Those are people that can barely feed themselves now. They can't educate their children and they're not mobile, they can't move away because if they were mobile and could move away, maybe they could go to Alberta. But those are the type of people don't have education, they don't have skilled trades, so they got to stay, they're forced to stay.

God bless the people that can move, to get off this rock and not come back, more power to them far as I'm concerned. I wouldn't want to move myself because I've had a comfortable living here and I love this island. But for the people who can't maintain that standard of living, they got to go.

Newfoundland people are not lazy by no means. I've been in the workforce 40 years

Page 137 - Page 140

	Page 141		Page 142
1 1 1	MR. HANN:	1	on this island, very hard times. And I worked
2	and I know Newfoundland people. And we were	2	on the Labrador also, so you might say I've
3	some of the best trades anywhere in North	3	been here, there and everywhere.
4	America, anywhere in the world, could qualify	4	But sir, I thank you for the opportunity
5	with any of them. But when you get down in	5	to get here and explain some of those things
6	that category that we close our schools and we	6	to you.
7	close out everything else because we can't	7	But one time in this province we could
8	afford to operate them, we don't have trained	8	rely on government too for some hand outs, but
9	people. And everybody's seeing now what's	9	that day is finished also. We can't rely on
10	going to happen in the future. We're going to	10	governments any more because they have a
11	have a shortage of trades people. So where do	11	large deficit also. We can't rely on minimum
12	we go? We import them. Who would want to	12	wage going up every other day. That can't be
13	come here under conditions that we're	13	because if we do that, we'll put other people
14	providing right now? We're not providing	14	out of business. So we're in quite of bind
15	ideal conditions for people to move into this	15	when you look at the big picture.
16	province. All we're doing is providing people	16	But when I look at the nine percent
17	to out migrate.	17	increase, nine and a half percent and I look
18	And I don't know where the utility	18	at the people that are sick and people with
19	companies are going to get their money if they	19	osteoporosis and people who need milk and
20	keep raising their rates. We just can't rely	20	things and I look and see what they can do
21	on industries because the industries won't	21	away with first. Food on the table is one of
22	even be here. So I can see if we keep on	22	the first things to go, because they will cut
23	going the way we're going without producing	23	back. And when you cut back on the basic
24	vast amounts of power from the source that we	24	needs of living, you are more vulnerable to
25	have on the Labrador, we're in for hard times	25	get sick, you're more vulnerable for flus and
123	nave on the Euclidean, we le in for hard times	23	get siek, you ie more vamerable for mas and

Mr. Hann, I'm very happy to hear you talk about conservation and the common sense approach that you advocate here. Who's advocating keeping lights on from October to February? A. February.	1 2 3 4 5 6 7 8 9 10 11 12 13 0 14 15 16 17 18 19 20 21 22	city all lit up. Q. And so it's the City Hall or the carnival committee? A. Yes, carnival committee, City Hall. Q. And what are they suggesting, that you just move from Christmas right into - A. Well, extend Christmas into February. Q. Into February and keep your lights up for the duration? A. Yes. Q. Okay. Thank you, very much, sir. No further questions. CHAIRMAN: Q. Thank you, very much, Mr. Hann. A. Thank you for the opportunity. Q. You retired yourself? A. Yes, sir. Q. What did you do? A. I worked in Corner Brook Pulp and Paper. Q. I see. Very good. A. And five years out in western Canada. Q. You still maintain your own house?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	then you put a higher cost on the Medicare program. It's an ongoing circle. Somebody has to have common sense enough to look at it and see that enough is enough in this province. We can't keep on going the way we're going, increase, increase. It's nice to say increase, it's beautiful. I wish somebody would increase my pension too to keep up with inflation. But that's not so. And you're all going to be in the same boat, every last one of you here today, you're all going to be in it, and then you'll know all about it when it's too late. Well, thank you, Mr. Chairman, for the opportunity. Q. Mr. Browne? BROWNE, Q.C.: Q. Yes. Mr. Hann, I'm very happy to hear you talk about conservation and the common sense approach that you advocate here. Who's advocating keeping lights on from October to February? A. February. Q. Who is -	1 2 3 4 5 6 7 8 9 10 11 12 13 0 14 15 16 17 18 19 20 21 22 23	city all lit up. Q. And so it's the City Hall or the carnival committee? A. Yes, carnival committee, City Hall. Q. And what are they suggesting, that you just move from Christmas right into - A. Well, extend Christmas into February. Q. Into February and keep your lights up for the duration? A. Yes. Q. Okay. Thank you, very much, sir. No further questions. CHAIRMAN: Q. Thank you, very much, Mr. Hann. A. Thank you for the opportunity. Q. You retired yourself? A. Yes, sir. Q. What did you do? A. I worked in Corner Brook Pulp and Paper. Q. I see. Very good. A. And five years out in western Canada. Q. You still maintain your own house? A. Pardon?

]]	CHAIRMAN:	1	process over the years. And I think that	
2	Q. Thank you, sir, very much.	2	indicates the level of interest, certainly,	
3	A. Thank you.	3	that's here. So I would thank you all. We	
4	Q. That brings, I think, to a conclusion. Okay.	4	will be carefully considering and examining	
5	I notice Ms. Blundon down there shaking her	5	the information that we have along with	
1	head in the affirmative. That brings, I	6	everything else in our decisions in issuing	
7	guessconcludes today's proceedings. And I'd	7	our final order. And the opportunity still	
8	like to thank everybody who attended today and	8	exists, as I indicated earlier, for letters of	
9	a special thanks indeed to the presenters.	9	comment to be forwarded to the Board prior to	
10	Somebody said that they weren't making a	10	the closing. And Ms. Blundon would only be	
11	scientific presentation. This is not about	11	happy to provide some information on that to	
12	scientific presentations, it's not necessarily	12	anyone who would wish to do that. And I'd	
13	about facts and figures, to be honest with	13	like to finally again thank everybody. It's	
14	you; it's a matter of people be given the	14	probably beyond people's lunchtime now, but I	
15	opportunity to express in their own way how	15	appreciate certainly your attention. And I	
16	this Application affects, I guess, theirin a	16	also like to thank the parties for your	
17	personal way, their family lives, their	17	participation here today as well. Thank you.	
18	personal lives, their business lives and other	18 Upo	on conclusion at 12:44 p.m.	
19				
20	think as far as I can see we heard a good deal			
21	of that this morning. And certainly, there's			
22	been a lot of interest, there's a lot of			
23	interest expressed here today. As I said at			
24	the outset, 14 presentations would be the most			
25	that I've seen in my involvement in this
