CAT ARM - GOVERNORS

(your fax Jan. 15. 1996)

as you indicate, I mentioned in Dec. 1994 that the analog electronic cards used at CAT ARM will soon be obsolete.

SULZER ELECTRONICS, who manufactures the various electronic cards for the whole SULZER Group, was postponing the date when to stop manufacturing the analog electronic cards, therefore we did not yet come back to you with further information.

The following has now been decided :

SICOS 1200 - (analog electronic cards for ETR, SM1200 etc.)

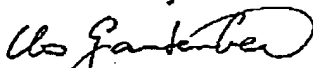

- | | |
|--|---------------|
| - Last sales for new projects by | July 31. 1996 |
| - Advise Sulzer Electronics of demand by | May 31. 1996 |
| - Replacement parts available until | end of 2004 |
| - Repair of cards until | end of 2004 |

NOTE:

SULZER HYDRO - sales will officially inform our clients early 1996

Ps.: (attached find translation of note we received from SULZER HYDRO Switzerland)

Yours sincerely

Urs Gantenbein

Re: Cat Arm Governor Replacement **CC:**

☐ Urgent ☐ For Review ☒ Please Comment ☐ Please Reply ☐ Please Recycle

• **Comments:** I am looking at the need to replace the controls portion of the governors on the two units at Cat Arm. I have to prepare a report on the condition of these controls and whether they should be replaced and, if so, when. In an earlier fax from you to Darren Moore at Bay D'Espoir you said that replacement cards and repair services for the cards would be available until the end of 2004. I would like the following information:

- 1) Is the 2004 date still valid for the repair of cards? → Yes
 - 2) What do you recommend as a replacement and could you send me information? → Will be sent to you
 - 3) What is the estimated cost for the replacement system? →
 - 4) What is the estimated cost for on site assistance from Sulzer Hydro? }
 - 5) What is the delivery time after receipt of order? }
- We will issue a quote to you

Please call me if you need any further information.

Thank-you

Rick Leggo

Dear Rick,
We will review the system you have and provide you with a quote for new hardware and programming and installation at site.

Regards

Urs
