

1    Q.    Ref: Schedule B, Project Title – Purchase/Install Ambient Monitoring System  
2           Enhancement, p. B-19. Reference is made to approval having been provided  
3           for Hydro to conduct a study to investigate technologies to reduce air  
4           emissions including particulates at Holyrood (p. B-20). Has Hydro completed  
5           this study, or is this project (improved ambient monitoring) being used to  
6           generate data for this use in the study?

7  
8  
9    A.    The two projects are independent. The Ambient Monitoring System  
10          Enhancement project will involve the addition of equipment to measure fine  
11          particulate matter and oxides of nitrogen at the existing monitoring stations.  
12          A separate study is also in progress and is investigating the various  
13          technologies and fuel options available to Hydro to reduce airborne  
14          emissions from the Holyrood Generating Station and will be completed late in  
15          2003.
