

1 Q. **TRO Evidence** Does Hydro perform any analysis to determine the
2 relationship between revenue generated by increased capacity and the cost
3 of that increased capacity?
4

5

6 A. Hydro does not do any analysis or comparison of the cost of increasing
7 generation capacity relative to the increased revenues. Based on its
8 obligation to serve, Hydro plans its generation requirements based on its
9 forecasted load growth. All options for increased generation capacity or
10 demand side management are investigated to determine the least cost option
11 for meeting the load requirements.
