

1 Q. **Ref: Mobile Radio System Request for Information Technical**
2 **Specification, p.5, Section 2.1.** The minimum requirement of the proposed
3 MRS is to be functionally equivalent to the present system(s), unless
4 otherwise noted in the RFI. Data capability, roaming, and user validation are
5 required features noted in the Summary of Findings and as future
6 requirements in Attachment 2a, yet are not requested in the Technical
7 Specification document. Please explain why these features are not part of
8 the technical specifications.

9

10

11 A. Features described in Attachment 2a were included in the Technical
12 Specification document. Section 2.1 of the Technical Specification refers the
13 reader to the Attachment and then states “The proposed MRS...shall
14 function, as a minimum requirement, similar to the existing MRS”.
