

1 Q. **Ref: Mobile Radio System Request for Information Technical**  
2 **Specification, p.6, Section 2.2.** Does the requirement of VoIP backhaul at  
3 NP sites preclude the use of MRS technology using T1 or fractional T1  
4 backhaul?

5  
6  
7 A. The requirement for VoIP backhaul at NP sites would not normally preclude  
8 the use of MRS technology using T1 or fractional T1 backhaul since  
9 commonly available technology exists to encapsulate T1 and fractional T1  
10 traffic within IP.
