

1 **Wind Generation Inventory Study, p. B-9, \$143,200**

2 Q. Does NLH intend to include proposals from other interested parties in its
3 review of potential wind resource sites for the development and supply of
4 wind generation to the Province?

5

6

7 A. The current proposal to complete a Wind Generation Inventory Study is
8 intended to identify sites that NLH may wish to develop on its own at some
9 future date. These sites would be expected to compete with resources from
10 other parties interested in providing additional generation supply for the
11 Island system.
