

1 Q. Please discuss whether Hydro has any specific peak (MW) or energy (GWh)
2 savings targets for its DSM programming. If so, please describe and provide
3 details of the types of savings and the targets for each customer class.
4 Please also indicate whether Hydro's DSM programs are primarily aimed at
5 capacity or energy savings.

6

7

8 A. Currently, the Energy Conservation Program Manager is exploring and
9 evaluating a variety of potential Demand Side Management initiatives to
10 create a comprehensive program targeting all electricity users – residential,
11 commercial and industrial. See also CA 167 NLH.

12

13 Each specific initiative implemented in the new program will have established
14 savings targets and be aimed at capacity or energy savings, as deemed
15 appropriate. The development process of each initiative will include system
16 planning criteria in determining the appropriate focus.
