

1 Q. Regulated Activities Evidence, Table 4: Please indicate all new supply-side
2 resources and demand side resources assumed to be in service in this table
3 (if any), indicating for each both the peak capacity and the energy
4 contribution.

5

6

7 A. Table 4 provides Hydro's current long-term load forecast against the capacity
8 of the existing system. The purpose of the table is to provide an indication of
9 the timing of the requirement for the next new generation source. Hydro's
10 generation expansion plan for this load forecast is presented in IC 53 NLH.
